ELSEVIER

Diamond and Related Materials 10 (2001) 2246–2278

DIAMOND AND RELATED MATERIALS

www.elsevier.com/locate/diamond

Subject Index of Volume 10

β-SiC
Epitaxial growth of β-SiC on Si (100) by low energy ion beam deposition, 1927

γ-coefficient
CVD diamond: a novel high γ-coating for plasma display panels?, 809

3C–SiC/Si
Optical and structural properties of SiC layers grown by an electron cyclotron resonance CVD technique, 1264

3C-SiC
Liquid phase epitaxial growth of 3C-SiC films deposited on Si, 1255
Defects at the carbon terminated SiC(001) surface, 1259
Post-growth rapid thermal annealing effect on hydrogenated amorphous silicon carbide thin film, 1268

4H–SiC
Stress related morphological defects in SiC epitaxial layers, 1246

4H-SiC
Monte Carlo simulation of vertical MESFETs in 2H, 4H and 6H-SiC, 1283

6H-SiC
The interfacial properties of erbium films on the two polar faces of 6H-SiC(0001), 13
Atomic hydrogen beam etching of carbon superstructures on 6H-SiC (0001) studied by reflection high-energy electron diffraction, 1218
Monte Carlo simulation of vertical MESFETs in 2H, 4H and 6H-SiC, 1283

915 MHz
Diamond films grown by a 60-kW microwave plasma chemical vapor deposition system, 1569

a-C
Mechanical properties of nanometric structures of Si/SiC, C/SiC and C/SiN produced by PECVD, 1115

a-C:H
CVD diamond: a novel high γ-coating for plasma display panels?, 809

a-C:H films
Film growth and relationship between microstructure and mechanical properties of a-C:H:F films deposited by PECVD, 125

a-SiC
Mechanical properties of nanometric structures of Si/SiC, C/SiC and C/SiN produced by PECVD, 1115

a-SiN
Mechanical properties of nanometric structures of Si/SiC, C/SiC and C/SiN produced by PECVD, 1115

Abrading
Multi-layer structure for chemical vapor deposition diamond on electroplated diamond tools, 332

Absorption
Energy distribution of thermally emitted negative particles from type Ia diamond (100), 496
Electrical conduction in nanostructured carbon films produced by supersonic cluster beam deposition, 989
NEXAFS characterization of nanostructured carbon thin-films exposed to hydrogen, 1195

Acceptor states
Deep level transient spectroscopy of CVD diamond: the observation of defect states in hydrogenated films, 610

Accurate measurement
Accurate measurement of strength and fracture toughness for miniature-size thick diamond-film samples by three-point bending at constant loading rate, 770

Acetylene
On the mechanism of CH_3 radical formation in hot filament activated CH_4/H_2 and C_2H_2/H_2 gas mixtures, 358
Oriented carbon microfibers grown by catalytic decomposition of acetylene and their field emission properties, 878

Acoustic emission
Comparison of the adhesion of diamond films deposited on different materials, 797

Adhesion
Fabrication and application of chemical vapor deposition diamond-coated drawing dies, 33
High compressive stress in nanocrystalline diamond films grown by microwave plasma chemical vapor deposition, 352
Deposition of alumina coatings on monocrystalline diamonds by sol–gel techniques, 515
Transition metal oxide anti-reflection coatings for airborne diamond optics, 536
Effect of WC-Co substrates pre-treatment and microstructure on the adhesive toughness of CVD diamond, 786
Comparison of the adhesion of diamond films deposited on different materials, 797
Comparison of deposition methods for ultra thin DLC overcoat film for MR head, 1017
Effects of SiO_x-incorporation hydrocarbons on the tibological properties of DLC films, 1058
Formation and growth of c-BN films in various conditions: improvement of the adherence, 1357
Microstructure and adhesion characteristics of diamond-like carbon films deposited on steel substrates, 1528

Elsevier Science B.V.
PII: S0925-9635(01)00572-6

Adherent diamond coatings on cemented carbide substrates with different cobalt contents, 1700
Influence of substrate treatment on the tribological properties of DLC coatings, 2232

Adhesion force
Analysis of diamond nucleation on molybdenum by biased hot filament chemical vapor deposition, 383

Adhesion strength
Adhesion properties of diamond-like coated orthopaedic biomaterials, 1098
Effect of adhesion strength of DLC to steel on the coating erosion mechanism, 1824

Adsorbate
Patterned growth and field emission properties of vertically aligned carbon nanotubes, 1457

AFM cantilever
Intrinsic stress measured on ultra-thin amorphous carbon films deposited on AFM cantilevers, 94

AFM cantilevers
Characterization of AFM cantilevers coated with diamond-like carbon, 2190

Al and Cu
Formation of a conducting layer by high energy metal ion implantation into diamond, 606

Aligned MWNT
Growth of carbon nanotubes by chemical vapor deposition, 1235

Alkalis
Potassium adsorption on hydrogen- and oxygen-terminated diamond(100) surfaces, 519

AlN
The ohmic character of doped AlN films, 1322
Pulsed sub-band-gap photoexcitation of AlN, 1326

Aluminium nitride
Properties of aluminium nitride coating obtained by vacuum arc discharge method with plasma flow separation, 1314
Dielectric characteristics of AlN films grown by d.c.-magnetron sputtering discharge, 1317

Aluminum nitride
Near band-edge transitions in AlN thin films grown on different substrates, 1300

Amorphous
The effect of hydrogen- and oxygen-plasma treatments on dielectric properties of amorphous carbon nitride films, 1147

Amorphous boron nitride
Is there a new form of boron nitride with extreme hardness?, 2010

Amorphous carbon
Intrinsic stress measured on ultra-thin amorphous carbon films deposited on AFM cantilevers, 94
Real-time monitoring, growth kinetics and properties of carbon based materials deposited by sputtering, 117
Evidence for excitonic behavior of photoluminescence in polymer-like a-C:H films, 168
Characterisation of defects in amorphous carbon by electron paramagnetic resonance, 174
Localisation and density of states in amorphous carbon-based alloys, 191
Applications of tetrahedral amorphous carbon in limited volatility memory and in field programmable gate arrays, 230
Amorphous carbon based materials as the interconnect dielectric in ULSI chips, 234
The effect of film resistance on electron field emission from amorphous carbon films, 868
Current-induced conditioning of hydrogenated amorphous carbon thin films for field emission, 873
Electron field emission from carbon films grown from pyrolysis of kerosene, 883
Field emission studies of low-temperature thermal annealing of nitrogen-doped hydrogenated amorphous carbon (a-C:H:N) films, 889
Microstructural and mechanical properties of nanometric-multilayered a-CN/a-C/ . . . /a-CN coatings deposited by rf-magnetron sputtering and nitrogen ion-beam bombardment, 952
Influence of stress on the electron core level energies of noble gases implanted in hard amorphous carbon films, 956
A complementary study of bonding and electronic structure of amorphous carbon films by electron spectroscopy and optical techniques, 960
Thick, well-adhered, highly stressed tetrahedral amorphous carbon, 1011
Mechanical properties of d.c. magnetron-sputtered and pulsed vacuum arc deposited ultra-thin nitrogenated carbon coatings, 1024
Switching phenomena in boron-implanted amorphous carbon films, 1036
The structure and tribological property of amorphous carbon and carbon nitride films prepared by ECR plasma sputtering method, 1093
Comparative study of microstructure in a-C_xN_{1-x} films deposited by radiofrequency magnetron sputtering, 1156

Amorphous carbon and disordered carbon
Electronic transport, photoconductivity and photoluminescence in amorphous carbons, 207

Amorphous carbon composite
Field emission from metal-containing amorphous carbon composite films, 1727

Amorphous carbon films
Relations between the deposition conditions, the microstructure and the defects in PECVD hydrogenated amorphous carbon films; influence on the electronic density of states, 182
Electronic properties of hydrogenated amorphous carbon films deposited using ECR-RF plasma method, 200

Amorphous carbon nitride
Carbon nitride thin-films deposited from coupled r.f.-magnetron sputtering and ion beam-assisted processes, 1175

Amorphous hydrogenated carbon
Fluorine incorporation into amorphous hydrogenated carbon films deposited by plasma-enhanced chemical vapor deposition: structural modifications investigated by X-ray photoelectron spectrometry and Raman spectroscopy, 910
Electron paramagnetic resonance study of ion implantation induced defects in amorphous hydrogenated carbon, 993
Mechanical properties of a-C:H multilayer films, 1833

Amorphous hydrogenated carbon film
Wet etching of hydrogenated amorphous carbon films, 976

Amorphous multilayers
Mechanical properties of nanometric structures of Si/SiC, C/SiC and C/SiN produced by PECVD, 1115

Amorphous silicon carbon alloys
Density of gap states in amorphous hydrogenated silicon car-

bide determined using high-frequency capacitance-voltage measurement technique, 1273

Amorphous silicon carbon films
Amorphous Si_xC_{1-x} films: an example of materials presenting low indentation hardness and high wear resistance, 1053

Anisotropic etching
Anisotropic etching of a fine column on a single crystal diamond, 1732

Annealing
Effect of high temperature annealing on optical and thermal properties of CVD diamond, 546
Electron paramagnetic resonance study of ion implantation induced defects in amorphous hydrogenated carbon, 993

Applications
Use of high-sensitivity diamond detectors in DC mode for detailed beam-profile measurements in particle accelerators, 706
CVD diamond for components and emitters, 1736
Growth of detector grade CVD diamond films and microscopic interpretation of their efficiency and charge collection distance in the normal and pumped states, 1783
Diamond-like carbon films in multilayered interference coatings for IR optical elements, 1846

Applications of ta-C
Thick, well-adhered, highly stressed tetrahedral amorphous carbon, 1011

Arc discharge method
Internal stresses in ta-C films deposited by pulse arc discharge method, 1103

Arc plasma jet evaporation
Arc plasma jet method producing single-wall carbon nanotubes, 1185

Arc pulse
Effect of adhesion strength of DLC to steel on the coating erosion mechanism, 1824

Areal density growth
Diamond-like carbon applications in high density hard disc recording heads, 271

Argon plasma
Growth of faceted, ballas-like and nanocrystalline diamond films deposited in $CH_4/H_2/Ar$ MPCVD, 2161

Assembly devices
Ultrananocrystalline diamond thin films for MEMS and moving mechanical assembly devices, 1952

Atmospheric pressure DC plasma
Optical diagnostics of an atmospheric pressure diamond-depositing DC plasma reactor, 1565

Atomic force microscopy
AFM investigation of growth process of C_{60} thin films on a KBr(001) surface, 980
Diamond-like-carbon and molybdenum disulfide nanotribology studies using atomic force measurements, 1049

Atomic hydrogen
The effect of hydrogen- and oxygen-plasma treatments on dielectric properties of amorphous carbon nitride films, 1147

Atomically flat surface
High quality homoepitaxial CVD diamond for electronic devices, 281

Ballas diamond
Growth of faceted, ballas-like and nanocrystalline diamond films deposited in $CH_4/H_2/Ar$ MPCVD, 2161

Band structure
Optical third-harmonic generation from an array of aligned carbon nanotubes with randomly distributed diameters, 27
Oxygen-induced surface state on diamond (100), 500
Density of gap states in amorphous hydrogenated silicon carbide determined using high-frequency capacitance-voltage measurement technique, 1273

Band-A
Origin of band-A emission in homoepitaxial diamond films, 526

Band-gap
Pulsed sub-band-gap photoexcitation of AlN, 1326

BCN
Bond modification of BCN films on Ni substrate, 1137

Bias
Positive dc bias-enhanced diamond nucleation with high CH_4 concentration, 1470
Growth of nanocrystalline diamond films by biased enhanced microwave plasma chemical vapor deposition, 1592

Bias, Chemical vapor deposition
High compressive stress in nanocrystalline diamond films grown by microwave plasma chemical vapor deposition, 352

Bias-enhanced nucleation
Theoretical analysis of ion bombardment roles in the bias-enhanced nucleation process of CVD diamond, 1622

Binding energy shifts
Influence of stress on the electron core level energies of noble gases implanted in hard amorphous carbon films, 956

Bio-chemistry
Diamond micro system for bio-chemistry, 722

Bio-medical applications
Amorphous carbon as a bio-mechanical coating — mechanical properties and biological applications, 153

Biocompatibility
Electrochemical behaviour of electrodes assembled with Ti-containing diamond films, 627

Biomaterial
Adhesion properties of diamond-like coated orthopaedic biomaterials, 1098

Biomaterials
Nano-scratch and fretting wear study of DLC coatings for biomedical application, 1448

BN phases
Synthesis, HRTEM and electron diffraction studies of B/N-doped C and BN nanotubes, 63
Formation and characterisation of c-BN thin films deposited by microwave PECVD, 1369

BN/Si diode
Study on electrical characteristics of metal/boron nitride/metal and boron nitride/silicon structures, 1404

Bonding
Bonding structure of carbon nitride films deposited by reactive plasma beam sputtering, 1142
X-Ray absorption studies of bonding environments in graphitic carbon nitride, 1170

Group III–V impurities in β-SiC: lattice distortions and solubility, 1278
XPS studies of amorphous SiCN thin films prepared by nitrogen ion-assisted pulsed-laser deposition of SiC target, 1921

Boron
BN substitution reaction of fullerene using an excimer laser irradiation, 1228

Boron carbide
Laser ablation of boron carbide: thin-film deposition and plume analysis, 1412

Boron carbon nitride
X-Ray absorption studies of cubic boron–carbon–nitrogen films grown by ion beam assisted evaporation, 1165

Boron doping
Synthesis, HRTEM and electron diffraction studies of B/N-doped C and BN nanotubes, 63
Electrical properties of thick boron and nitrogen contained CVD diamond films, 593
Stress study of HFCVD boron-doped diamond films by X-ray diffraction measurements, 750
New directions in structuring and electrochemical applications of boron-doped diamond thin films, 1799

Boron nitride
High-resolution electron microscopy and structural optimization of C_{36}, $B_{36}N_{36}$ and $Fe_{36}N_{36}$ clusters, 1205
Synthesis and characterization of cobalt nanoparticles encapsulated in boron nitride nanocages, 1210
Synthesis of boron nitride nanotubes and nanocapsules with LaB_6, 1231
The influence of the h-BN morphology and structure on the c-BN growth, 1352
Synthesis of boron nitride film with low dielectric constant for its application to silicon ultralarge scale integrated semiconductors, 1375
Atomic structures and stability of hexagonal BN, diamond and Au multiply-twinned nanoparticles with five-fold symmetry, 1398
Study on electrical characteristics of metal/boron nitride/metal and boron nitride/silicon structures, 1404
Structure analysis of cBN films prepared by DC jet plasma CVD from an $Ar–N_2–BF_3–H_2$ gas system, 1881
Is there a new form of boron nitride with extreme hardness?, 2010

Boron nitride thin films
Multichannel ellipsometry from 1.5 to 6.5 eV for real time characterization of wide band gap materials: phase identification in boron nitride thin films, 1304

Buffer layer
Characteristics of Si—C—N films deposited by microwave plasma CVD on Si wafers with various buffer layer materials, 1910

Bulk diamond
Negative charging of mono-and divacancies in IIa diamonds by monochromatic illumination, 585

C–O–H system
Diamond and graphite crystallization from C–O–H fluids under high pressure and high temperature conditions, 2131

c-BN
Ionoluminescence in CVD diamond and in cubic boron nitride, 568
Nucleation of c-BN from PECVD and TACVD growth species: a theoretical study, 1363
Deposition of cubic boron nitride by laser ablation, 1385

C_{60} thin film
Superhard and superelastic films of polymeric C_{60}, 2044

Carbide (SiC)
Hydrogenation of 6H-SiC as a surface passivation stable in air, 1291

Carbides
Formation of silicon carbide and silicon carbonitride by RF-plasma CVD, 1160
Liquid phase epitaxial growth of 3C-SiC films deposited on Si, 1255
Micromechanical and microtribological properties of BCN thin films near the B_4C composition deposited by r.f. magnetron sputtering, 1892

Carbon
A new carbon modification: 'n-diamond' or face-centred cubic carbon?, 99
Deposition of functional carbon compound thin films by synchrotron radiation ablation, 937
Growth of carbon nanostructure materials using laser vaporization, 1190
NEXAFS characterization of nanostructured carbon thin-films exposed to hydrogen, 1195
High-resolution electron microscopy and structural optimization of C_{36}, $B_{36}N_{36}$ and $Fe_{36}N_{36}$ clusters, 1205
Catalytic growth mechanism of carbon nanofibers through chemical vapor deposition, 1214
A classical molecular dynamics simulation of the carbon cluster formation process on a parallel computer, 1224

Carbon films
Electrical conduction in nanostructured carbon films produced by supersonic cluster beam deposition, 989

Carbon nanofibers
The effects of pre-treatment and catalyst composition on growth of carbon nanofibers at low temperature, 1241

Carbon nanotube
Growth of carbon nanotubes by chemical vapor deposition, 1235
Patterned growth and field emission properties of vertically aligned carbon nanotubes, 1457
Electronic properties of carbon nanotubes with pentagon–heptagon pair defects, 1818
Synthesis of high-density carbon nanotube films by microwave plasma chemical vapor deposition, 1947

Carbon nanotube emitters
An under-gate triode structure field emission display with carbon nanotube emitters, 1705

Carbon nanotubes
Optical third-harmonic generation from an array of aligned carbon nanotubes with randomly distributed diameters, 27
Novel plasma chemical vapor deposition method of carbon nanotubes at low temperature for field emission display application, 248
Application of carbon nanotubes to field emission displays, 265
The effects of pre-treatment and catalyst composition on growth of carbon nanofibers at low temperature, 1241
Carbon nanotube growth by rapid thermal processing, 1810
Field emission from patterned carbon nanotube emitters produced by microwave plasma chemical vapor deposition, 2157

Carbon nitride
Dual ion plasma-beam sources used to maximise sp^3 C–C bonds in carbon nitride, 1125
Photoluminescence and infra-red absorption of annealed a-CN_x:H

films, 1152
X-Ray absorption studies of bonding environments in graphitic carbon nitride, 1170
AFM and XPS studies of a homoepitaxial diamond (001) surface nitrided using 500-eV N_2^+ ion beam, 1676
Correlation between hydrogen content and structure of pulsed laser deposited carbon nitride films, 2107
Synthesis of amorphous carbon nitride using reactive ion beam sputtering deposition with grazing bombardment, 2184
Mechanical properties and characterisation of very thin CN_x films synthesised by IBAD, 2199

Carbon nitride bulk
Mechanosynthesis of carbon nitride compounds, 1995

Carbon nitride film
Chemical bonding in carbon nitride films studied by X-ray spectroscopies, 1897

Carbon nitride films
Preparation of nitrogen-rich CN_x films with inductively coupled plasma CVD and pulsed laser deposition, 1901
Influence of nitrogen ion energy on the Raman spectroscopy of carbon nitride films, 2137

Carbon polymorphs
Is there theoretical evidence for a metallic carbon polymorph with space group symmetry $Fm\bar{3}m$ at ambient conditions?, 2225

Carbon-based cathode
Field emission from nano-cluster carbon films, 260

Carbonado
The influence of boron compounds' particles (TiB_2, BN^{cub}) on the thermal stability and the mechanical strength of synthesized carbonado after heating, 2024

Carrier generation
Carrier generation within the surface region of hydrogenated thin film polycrystalline diamond, 423

Catalytic process
The effect of metal–solvent properties on the alteration of specific zones on a carbon phase diagram, 1597

Catalytic processes
Mechanistic aspects of the sonoelectrochemical degradation of the reactive dye Procion Blue at boron-doped diamond electrodes, 662
Catalytic growth mechanism of carbon nanofibers through chemical vapor deposition, 1214

Cathodoluminescence
Origin of band-A emission in homoepitaxial diamond films, 526
Luminescence study of polycrystalline CVD diamond films containing a small amount of nitrogen, 542
Near band-edge transitions in AlN thin films grown on different substrates, 1300
Near-field cathodoluminescence of nanoscopic diamond properties, 1647
Cathodoluminescence of phosphorus doped (111) homoepitaxial diamond thin films, 1652
Change of luminescence character of Ib diamonds with HPHT treatment, 1665
Characteristics of Si—C—N films deposited by microwave plasma CVD on Si wafers with various buffer layer materials, 1910
High-pressure synthesis and characterization of diamond from a sulfur–carbon system, 2145

CH_4/Ar plasmas
Ar-dilution effects on the elastic and structural properties of hydrogenated hard carbon films deposited by plasma-enhanced chemical vapor deposition, 1088

Characterisation
Synthesis of amorphous carbon nitride using reactive ion beam sputtering deposition with grazing bombardment, 2184

Characterization
Preparation of diamond wafers by DC arcjet plasma process under a gas recycling mode, 327
Ion channeling studies of hydrogen in homoepitaxially grown CVD diamond, 411
Low temperature excitation spectrum of phosphorus in diamond, 444
Injection dependent long carrier lifetimes in high quality CVD diamond, 574
Study of plasma efficiency as a function of arc current in filtered cathodic vacuum arc systems, 947
Comparative study of microstructure in a-C_xN_{1-x} films deposited by radiofrequency magnetron sputtering, 1156
Liquid phase epitaxial growth of 3C-SiC films deposited on Si, 1255
Photoconductivity of semi-insulating SiC:⟨V,Al⟩, 2035
Angle-dependent reflectometry as a technique for fast assessment of highly oriented diamond film quality, 2092

Chemical bonding
Chemical bonding in carbon nitride films studied by X-ray spectroscopies, 1897

Chemical non-equilibrium
Optical diagnostics of an atmospheric pressure diamond-depositing DC plasma reactor, 1565

Chemical passivation
Hydrogenation of 6H-SiC as a surface passivation stable in air, 1291

Chemical vapor deposited (CVD) diamond
Ionoluminescence in CVD diamond and in cubic boron nitride, 568

Chemical vapor deposition
Analysis of diamond nucleation on molybdenum by biased hot filament chemical vapor deposition, 383
Thickness dependent density distribution of gap states in undoped CVD diamond films, 998
The effects of pre-treatment and catalyst composition on growth of carbon nanofibers at low temperature, 1241
Atomic structures and stability of hexagonal BN, diamond and Au multiply-twinned nanoparticles with five-fold symmetry, 1398
Diamond films grown by a 60-kW microwave plasma chemical vapor deposition system, 1569
Growth of nanocrystalline diamond films by biased enhanced microwave plasma chemical vapor deposition, 1592
Growth of {111}-oriented diamond on Pt/Ir/Pt substrate deposited on sapphire, 1633
The introducing of fluorine into the deposition of BN: a successful method to obtain high-quality, thick cBN films with low residual stress, 1868
Preparation, morphology and microstructure of segmented graphite nanofibers, 2057
A comparative study of Ar and H_2 as carrier gases for the growth of SiC films on Si(100) by electron cyclotron resonance chemical vapor deposition at low temperature, 2075

Chemical vapor deposition (CVD)
Nitrogen incorporation in CVD diamond, 485
Fabrication and characterization of phosphorus-doped diamond

field emitters in triode-type field emission arrays, 834
Catalytic growth mechanism of carbon nanofibers through chemical vapor deposition, 1214
Characterization of nanocrystalline diamond films implanted with nitrogen ions, 1441
Unusual RHEED patterns of a homoepitaxial diamond (001) surface explained by surface tilt, 1655
Spectroscopic ellipsometry studies of nanocrystalline carbon thin films deposited by HFCVD, 1968

Chemical vapour deposition
Free-standing diamond films grown on cobalt substrates, 316
Diamond deposition in a DC-arc Jet CVD system: investigations of the effects of nitrogen addition, 370
Wettability studies of reactive brazing alloys on CVD diamond plates, 775
Formation and characterisation of c-BN thin films deposited by microwave PECVD, 1369
Laser plasma CVD diamond reactor, 1559
Synthesis of highly oriented CVD diamond films by ultra short bias enhanced nucleation step, 1637
Diamond electro-mechanical micro devices — technology and performance, 1684
Nano-structured nitrogenated carbon films — morphology and field emission, 1962

Chemical vapour deposition (CVD)
Electrochemical behaviour of electrodes assembled with Ti-containing diamond films, 627
MPCVD diamond tool cutting-edge coverage: dependence on the side wedge angle, 803
Mechanical and tribological properties of diamond-like carbon films prepared on steel by ECR-CVD process, 1855

Chemical vapour deposition (CVD) diamond
Microstructured diamond dies for transfer moulding, 7

Chemical vapour deposition diamond
High quality CVD diamond for detection applications: structural characterization, 1788

Chemisorption
Chemisorption of O_2 and CO on the K-modified diamond (100)2 × 1 surface, 2049
Field emission of polycrystalline diamond films grown by microwave plasma chemical vapor deposition. II. Effect of p-type doping in diamond, 2118

Chlorinated Hydrocarbons
Diamond growth reactor chemistry and film nucleation enhancement using chlorinated hydrocarbons, 1497

Chromium
Effect of chromium on the kinetics of the contact melting and the graphite-to-diamond transformation in the Co–Fe–C system, 1602

Chromium nitride
Multi-layer structure for chemical vapor deposition diamond on electroplated diamond tools, 332

Cluster
An ab initio electronic structure study of methyl adsorption and reaction on cluster models for the diamond surface, 39
Cluster assembling of nanostructured carbon films, 240

CN
Influence of ambient gas on diamond-like carbon films prepared by KrF pulsed laser deposition, 900

CN_x
Mechanosynthesis of carbon nitride compounds, 1995

CO_2-based plasmas
Molecular beam mass spectrometry investigations of low temperature diamond growth using CO_2/CH_4 plasmas, 393

Coating
High velocity sand impact damage on CVD diamond, 459
Deposition of alumina coatings on monocrystalline diamonds by sol–gel techniques, 515

Coating technology
Diamond-like carbon applications in high density hard disc recording heads, 271

Coatings
Transition metal oxide anti-reflection coatings for airborne diamond optics, 536

Cobalt
Free-standing diamond films grown on cobalt substrates, 316

Colour coating
Colour carbon coatings, 1121

Combustion growth
Process optimization in the low-pressure flat flame growth of diamond, 289

Composites
Electrochemical behaviour of electrodes assembled with Ti-containing diamond films, 627
Diamond/sp^2-bonded carbon structures: quantum well field electron emission?, 840

Compressive stress
Influence of stress on the electron core level energies of noble gases implanted in hard amorphous carbon films, 956
Thick, well-adhered, highly stressed tetrahedral amorphous carbon, 1011

Compressive stresses
Intrinsic stress measured on ultra-thin amorphous carbon films deposited on AFM cantilevers, 94

Computer simulation
EPR study of preferential orientation of crystallites in N-doped high quality CVD diamond, 480
A classical molecular dynamics simulation of the carbon cluster formation process on a parallel computer, 1224
Defects at the carbon terminated SiC(001) surface, 1259

Conditioning
Field emission from tetrahedral amorphous carbon films with various surface morphologies, 1515

Conduction path
A study on the conduction path in undoped polycrystalline diamond films, 2174

Conductive channels
Field emission from tetrahedral amorphous carbon films with various surface morphologies, 1515

Conductive scanning probe/atomic force (SPM/AFM)
Characteristics of low field-emission diamond films by scanning probe microscopy (SPM), 829

Conductivity
Characteristics of low field-emission diamond films by scanning probe microscopy (SPM), 829
Direct ion beam deposition of hard (> 30 GPa) diamond-like films

from RF inductively coupled plasma source, 931

Confocal Raman
Structure analysis of cBN films prepared by DC jet plasma CVD from an $Ar-N_2-BF_3-H_2$ gas system, 1881

Constant loading rate
Accurate measurement of strength and fracture toughness for miniature-size thick diamond-film samples by three-point bending at constant loading rate, 770

Correlations
Similarity in field electron emission from nanocrystalline diamond and related materials, 1719

Corrosion protection
Diamond-like carbon applications in high density hard disc recording heads, 271

Coulomb staircase
Numerical simulation of I–V characteristics of carbon nanotube based tunneling systems, 1814

Creep
Comparison of the creep properties of single crystal and polycrystalline diamond cutting tool materials, 755

Crystal growth
Liquid phase epitaxial growth of 3C-SiC films deposited on Si, 1255
Cross-sectional TEM study of unepitaxial crystallites in a homoepitaxial diamond film, 2030

Crystal morphology
High pressure synthesis of cubic boron nitride from Si-hBN system, 1465

Crystalline growth
A study of the crystalline growth of highly boron-doped CVD diamond: preparation of graded-morphology diamond thin films, 306

Crystallinity
Low temperature synthesis of P-SiC by a metal vapor vacuum arc ion source, 2195

Crystallization of diamond
Reactions between carbon and a reduced C–O–H fluid under diamond-stable HP–HT condition, 2125

Crystallization of graphite
Reactions between carbon and a reduced C–O–H fluid under diamond-stable HP–HT condition, 2125

Cubic boron nitride
Quantification of ion bombardment effects in c-BN thin films deposited by rf magnetron sputtering, 1347
Formation and growth of c-BN films in various conditions: improvement of the adherence, 1357
Formation and characterisation of c-BN thin films deposited by microwave PECVD, 1369
Cubic boron nitride film synthesis by reactive sputtering with pulsed RF substrate bias, 1380
Comparative aspects of the homogeneous degradation of c-BN and diamond, 1390
High pressure synthesis of cubic boron nitride from Si-hBN system, 1465
The introducing of fluorine into the deposition of BN: a successful method to obtain high-quality, thick cBN films with low residual stress, 1868
Depth resolved stress investigations of c-BN thin films, 1875
Synthesis and characterization of cubic boron nitride films: substrate bias and ion flux effects, 1886
Growth of cubic boron nitride films by ibad and triode sputtering: development of intrinsic stress, 2167

Cubic boron nitride (c-BN)
Pulsed laser deposition of cubic boron nitride films at high growth rates, 1973

Cubic boron nitride (CBN)
Point defects in cubic boron nitride crystals, 1408

Cubic carbon polymorph
Is there theoretical evidence for a metallic carbon polymorph with space group symmetry $Fm\bar{3}m$ at ambient conditions?, 2225

Current stressing
Current-induced conditioning of hydrogenated amorphous carbon thin films for field emission, 873

Current transport
The insulating properties of a-C:H on silicon and metal substrates, 216

Cut-off frequency
Potential applications of surface channel diamond field-effect transistors, 1743

Cutting tool
Wettability studies of reactive brazing alloys on CVD diamond plates, 775

CVD
UHV μ-electron beam evaluation of the CVD diamond particles grown on Si(001), 48
Metal-containing amorphous carbon film development using electron cyclotron resonance CVD, 132
Growth of diamond films by a 5-kW microwave plasma CVD reactor, 312
Preparation of diamond wafers by DC arcjet plasma process under a gas recycling mode, 327
Detection of C_2 radicals in low-pressure inductively coupled plasma source for diamond chemical vapor deposition, 388
Electrical properties and defect analysis of neutron irradiated undoped CVD diamond films, 601
Trapping–detrapping behavior in CVD diamond particle detectors, 645
Use of high-sensitivity diamond detectors in DC mode for detailed beam-profile measurements in particle accelerators, 706
Growth of carbon nanotubes by chemical vapor deposition, 1235
Vibrational sum-frequency observation of synthetic diamonds, 1643
Broadband electronics for CVD-diamond detectors, 1765
Growth of detector grade CVD diamond films and microscopic interpretation of their efficiency and charge collection distance in the normal and pumped states, 1783
Modeling the effect of oxygen on vapor phase diamond deposition inside micro-trenches, 2212

CVD diamond
CVD diamond for radiation detection devices, 631
MPACVD diamond films for surface acoustic wave filters, 681
Thermal conductivity measurements on CVD diamond, 731
Fracture toughness of the interface between CVD diamond film and silicon substrate in the relation with methane concentration in the source gas mixture, 760
Nanoindentation of CVD diamond: comparison of an FE model with analytical and experimental data, 765
Electrical characterization of CVD diamond–n^+ silicon junctions, 858
Nature of confinement of phonons in nanocrystalline CVD

diamond, 1477
A joint macro-/micro-Raman investigation of the diamond lineshape in CVD films: the influence of texturing and stress, 1535
Optical diagnostics of an atmospheric pressure diamond-depositing DC plasma reactor, 1565
The CVD growth of micro crystals of diamond, 1584
Theoretical analysis of ion bombardment roles in the bias-enhanced nucleation process of CVD diamond, 1622
The use of CVD-diamond for heavy-ion detection, 1770
Thermoluminescence properties of nitrogen containing chemical vapour deposited diamond films, 2084

CVD diamond and neon
Synthesis of diamond from ethanol highly diluted in neon/hydrogen mixtures, 927

CVD diamond vacuum windows
MPACVD-diamond windows for high-power and long-pulse millimeter wave transmission, 1692

CVD polycrystalline diamond
Hydrogen diffusion and stability in polycrystalline CVD undoped diamond, 405

CVD-diamond films
Ion channeling studies of hydrogen in homoepitaxially grown CVD diamond, 411

D-tensors
Interstitial aggregates in diamond, 434

d.c. Plasma CVD
Epitaxially grown free-standing diamond platelet, 2153

Damage recovery
Recovery treatments for ion-induced defects in high-quality homoepitaxial CVD diamond, 322

Damage temperature
Experimental and numerical study on pulsed-laser annealing process of diamond-like carbon thin films, 905

DC arc plasma jet
Diamond deposition in a DC-arc Jet CVD system: investigations of the effects of nitrogen addition, 370
Large area high quality diamond film deposition by high power DC arc plasma jet operating at gas recycling mode, 1551

DC plasma CVD
Preparation of diamond wafers by DC arcjet plasma process under a gas recycling mode, 327
Properties of diamond films deposited by multi-cathode direct current plasma assisted CVD method, 552
Generation of pulsed direct-current plasma above 100 torr for large area diamond deposition, 2220

Deep defects
Pulsed sub-band-gap photoexcitation of AlN, 1326

Deep level transient spectroscopy
Space charge spectroscopy of diamond, 639

Deep level transient spectroscopy (DLTS)
Deep level transient spectroscopy of CVD diamond: the observation of defect states in hydrogenated films, 610

Defect
A theoretical study of a sulfur impurity in diamond, 449
High velocity sand impact damage on CVD diamond, 459
Space charge spectroscopy of diamond, 639
Phosphorus doping and defect studies of diamond-like carbon films by pulsed laser deposition using camphoric carbon target, 984
Electron paramagnetic resonance study of ion implantation induced defects in amorphous hydrogenated carbon, 993
Defects at the carbon terminated SiC(001) surface, 1259
Paramagnetic defects in silicon carbide grains embedded in SiO_2 matrix, 1287
Point defects in cubic boron nitride crystals, 1408
Change of luminescence character of Ib diamonds with HPHT treatment, 1665
Growth of detector grade CVD diamond films and microscopic interpretation of their efficiency and charge collection distance in the normal and pumped states, 1783
Structure of unepitaxial crystallites in a homoepitaxial diamond film, 2096

Defect analysis
Electrical properties and defect analysis of neutron irradiated undoped CVD diamond films, 601

Defects
Characterisation of defects in amorphous carbon by electron paramagnetic resonance, 174
Hydrogen diffusion in B-ion-implanted and B-doped homo-epitaxial diamond: passivation of defects vs. passivation of B acceptors, 453
Defects in coloured natural diamonds, 474
Injection dependent long carrier lifetimes in high quality CVD diamond, 574
Electrical AC behaviour of MPCVD diamond Schottky diodes, 615
CVD diamond for radiation detection devices, 631
Trapping–detrapping behavior in CVD diamond particle detectors, 645
High-speed diamond photoconductors: a solution for high rep-rate deep-UV laser applications, 650
Structure analysis of cBN films prepared by DC jet plasma CVD from an $Ar–N_2–BF_3–H_2$ gas system, 1881

Degradation mechanism
Comparative aspects of the homogeneous degradation of c-BN and diamond, 1390

Density
X-Ray reflectometry study of diamond-like carbon films obtained by plasma-assisted chemical vapor deposition, 1491

Density functional theory
Is there theoretical evidence for a metallic carbon polymorph with space group symmetry $Fm\bar{3}m$ at ambient conditions?, 2225

Density of states
Localisation and density of states in amorphous carbon-based alloys, 191
The insulating properties of a-C:H on silicon and metal substrates, 216
Oxygen-induced surface state on diamond (100), 500

Density of states (DOS)
Thickness dependent density distribution of gap states in undoped CVD diamond films, 998
Density of gap states in amorphous hydrogenated silicon carbide determined using high-frequency capacitance-voltage measurement technique, 1273

Density-of-states distribution
Density of states distribution in AlN films measured by CPM and DLTS, 1335

Deposition

Relations between the deposition conditions, the microstructure and the defects in PECVD hydrogenated amorphous carbon films; influence on the electronic density of states, 182
Cluster assembling of nanostructured carbon films, 240
Dual ion plasma-beam sources used to maximise sp^3 C–C bonds in carbon nitride, 1125
Bonding structure of carbon nitride films deposited by reactive plasma beam sputtering, 1142
Deposition of cubic boron nitride by laser ablation, 1385
Generation of pulsed direct-current plasma above 100 torr for large area diamond deposition, 2220

Deposition behavior
Growth of carbon nanotubes by chemical vapor deposition, 1235

Desorption
Electrical conduction in nanostructured carbon films produced by supersonic cluster beam deposition, 989

Detectors
Diamond UV detectors for future solar physics missions, 673
High quality CVD diamond for detection applications: structural characterization, 1788

Device modeling
Heat-spreading diamond films for GaN-based high-power transistor devices, 744
Monte Carlo simulation of vertical MESFETs in 2H, 4H and 6H-SiC, 1283

Device performance
High quality homoepitaxial CVD diamond for electronic devices, 281

Di-electric resonators
New hybrid with Q-factor-pass-band microwave filter constructed with di-electric resonators and coupled with a thick-film microstrip line made in diamond substrates, 1511

Diamond
An ab initio electronic structure study of methyl adsorption and reaction on cluster models for the diamond surface, 39
UHV μ-electron beam evaluation of the CVD diamond particles grown on Si(001), 48
A new carbon modification: 'n-diamond' or face-centred cubic carbon?, 99
Preparation of diamond wafers by DC arcjet plasma process under a gas recycling mode, 327
Multi-layer structure for chemical vapor deposition diamond on electroplated diamond tools, 332
Diamond surface conductivity experiments and photoelectron spectroscopy, 416
C^+-damaged diamond: electrical measurements after rapid thermal annealing to 500°C, 463
Potassium adsorption on hydrogen- and oxygen-terminated diamond(100) surfaces, 519
Transition metal oxide anti-reflection coatings for airborne diamond optics, 536
Properties of diamond films deposited by multi-cathode direct current plasma assisted CVD method, 552
Electrical properties and defect analysis of neutron irradiated undoped CVD diamond films, 601
Deep level transient spectroscopy of CVD diamond: the observation of defect states in hydrogenated films, 610
pH sensing by surface-doped diamond and effect of the diamond surface termination, 667
Diamond UV detectors for future solar physics missions, 673
Diamond photodetectors for next generation 157-nm deep-UV photolithography tools, 693
Stress study of HFCVD boron-doped diamond films by X-ray diffraction measurements, 750
Comparison of the creep properties of single crystal and polycrystalline diamond cutting tool materials, 755
Wettability studies of reactive brazing alloys on CVD diamond plates, 775
Diamond deposition on hardmetal substrates after pre-treatment with aluminium or aluminium compounds, 790
CVD diamond: a novel high γ-coating for plasma display panels?, 809
Fabrication and characterization of phosphorus-doped diamond field emitters in triode-type field emission arrays, 834
Effect of non-diamond carbon etching on the field emission property of highly sp^2 bonded nanocrystalline diamond films, 847
Deposition of functional carbon compound thin films by synchrotron radiation ablation, 937
Oriented growth of diamond on (0001) surface of hexagonal GaN, 1343
Atomic structures and stability of hexagonal BN, diamond and Au multiply-twinned nanoparticles with five-fold symmetry, 1398
Positive dc bias-enhanced diamond nucleation with high CH_4 concentration, 1470
Diamond growth reactor chemistry and film nucleation enhancement using chlorinated hydrocarbons, 1497
Effect of ion beam nitriding on diamond nucleation and growth onto steel substrates, 1506
Diamond films grown by a 60-kW microwave plasma chemical vapor deposition system, 1569
Development of single- and multi-layered metallic films on diamond by ion beam-assisted deposition, 1578
Effect of chromium on the kinetics of the contact melting and the graphite-to-diamond transformation in the Co–Fe–C system, 1602
The high temperature–high pressure sintering of diamond–Cu–Si–B composite, 1607
Early stages of the HFCVD process on multi-vicinal silicon surfaces studied by electron microscopy probes (SEM, TEM), 1612
First stages of diamond nucleation on iridium buffer layers, 1617
The role of methyl radicals and acetylene in [100] vs. [111] diamond growth, 1627
Growth of {111}-oriented diamond on Pt/Ir/Pt substrate deposited on sapphire, 1633
Synthesis of highly oriented CVD diamond films by ultra short bias enhanced nucleation step, 1637
Cathodoluminescence of phosphorus doped (111) homoepitaxial diamond thin films, 1652
Analysis of piezoresistive properties of CVD-diamond films on silicon, 1670
AFM and XPS studies of a homoepitaxial diamond (001) surface nitrided using 500-eV N_2^+ ion beam, 1676
Diamond electro-mechanical micro devices — technology and performance, 1684
Field emission properties of diamond and carbon nanotubes, 1709
Imaging electron emission from diamond film surfaces: N-doped diamond vs. nanostructured diamond, 1714
Anisotropic etching of a fine column on a single crystal diamond, 1732
Potential applications of surface channel diamond field-effect transistors, 1743
The search for donors in diamond, 1749
Using ion implantation to dope diamond — an update on selected issues, 1756
Broadband electronics for CVD-diamond detectors, 1765
Chemisorption of O_2 and CO on the K-modified diamond (100)2 × 1 surface, 2049
Positron annihilation study of vacancies in type IIa diamonds

illuminated with monochromatic light, 2113
Field emission of polycrystalline diamond films grown by microwave plasma chemical vapor deposition. II. Effect of p-type doping in diamond, 2118
Epitaxially grown free-standing diamond platelet, 2153
Modeling the effect of oxygen on vapor phase diamond deposition inside micro-trenches, 2212

Diamond actuators
Diamond micro system for bio-chemistry, 722

Diamond chemical vapour deposition
On the mechanism of CH_3 radical formation in hot filament activated CH_4/H_2 and C_2H_2/H_2 gas mixtures, 358

Diamond coated tools
Adherent diamond coatings on cemented carbide substrates with different cobalt contents, 1700

Diamond coating
Fabrication and application of chemical vapor deposition diamond-coated drawing dies, 33

Diamond coatings
Comparison of the adhesion of diamond films deposited on different materials, 797

Diamond crystallization
Diamond and graphite crystallization from C–O–H fluids under high pressure and high temperature conditions, 2131

Diamond crystals
Silicon substrate preparation for epitaxial diamond crystals, 300

Diamond defects
Optical characterization of some irradiation-induced centers in diamond, 18
Hydrogen-acceptor interactions in diamond, 399
Near-field cathodoluminescence of nanoscopic diamond properties, 1647

Diamond deposition
Process optimization in the low-pressure flat flame growth of diamond, 289

Diamond doping
Surface engineering of diamond tips for improved field electron emission, 2178

Diamond film
Selective deposition of diamond films on insulators by selective seeding with a double-layer mask, 1573
Surface engineering of diamond tips for improved field electron emission, 2178

Diamond films
Diamond film growth in an oxygen atmosphere, 295
Growth of diamond films by a 5-kW microwave plasma CVD reactor, 312
High compressive stress in nanocrystalline diamond films grown by microwave plasma chemical vapor deposition, 352
Analysis of diamond nucleation on molybdenum by biased hot filament chemical vapor deposition, 383
High velocity sand impact damage on CVD diamond, 459
EPR study of preferential orientation of crystallites in N-doped high quality CVD diamond, 480
Characterization of diamond fluorinated by glow discharge plasma treatment, 490
Analysis of the Fano in diamond, 531
Effect of high temperature annealing on optical and thermal properties of CVD diamond, 546
Electrical properties of thick boron and nitrogen contained CVD diamond films, 593
Mechanistic aspects of the sonoelectrochemical degradation of the reactive dye Procion Blue at boron-doped diamond electrodes, 662
Influence of metal–diamond interfaces on the response of UV photoconductors, 698
An investigation of the surface reactivity of diamond photocathodes with molecular and atomic oxygen species, 710
CVD diamond optics for ultraviolet, 736
Ion-induced electron emission from Boron-doped diamond: effect of surface hydrogenation and sample temperature, 824
Thickness dependent density distribution of gap states in undoped CVD diamond films, 998
The roles of argon addition in the hot filament chemical vapor deposition system, 1523
Laser plasma CVD diamond reactor, 1559
Synthesis of nanocrystalline diamond films using microwave plasma CVD, 1588
Growth of nanocrystalline diamond films by biased enhanced microwave plasma chemical vapor deposition, 1592
Similarity in field electron emission from nanocrystalline diamond and related materials, 1719
New directions in structuring and electrochemical applications of boron-doped diamond thin films, 1799
Influence of CF_4 addition for HFCVD diamond growth on silicon nitride substrates, 2002
Formation of fibrous structures on diamond by hydrogen plasma treatment under DC bias, 2039
Angle-dependent reflectometry as a technique for fast assessment of highly oriented diamond film quality, 2092
Generation of pulsed direct-current plasma above 100 torr for large area diamond deposition, 2220

Diamond growth
Low temperature CVD diamond deposition using halogenated precursors — deposition on low melting materials: Al, Zn and glass, 347
Diamond deposition in a DC-arc Jet CVD system: investigations of the effects of nitrogen addition, 370
Molecular beam mass spectrometry investigations of low temperature diamond growth using CO_2/CH_4 plasmas, 393
Low temperature excitation spectrum of phosphorus in diamond, 444

Diamond growth and characterization
Free-standing diamond films grown on cobalt substrates, 316
Numerical modeling of a microwave plasma CVD reactor, 342
Defects in coloured natural diamonds, 474
Origin of band-A emission in homoepitaxial diamond films, 526
Synthesis of diamond from ethanol highly diluted in neon/hydrogen mixtures, 927

Diamond growth and noble gases
Synthesis of diamond from ethanol highly diluted in neon/hydrogen mixtures, 927

Diamond like-carbon
Diamond-like-carbon and molybdenum disulfide nanotribology studies using atomic force measurements, 1049

Diamond MEMS
Diamond micro system for bio-chemistry, 722

Diamond micro system
Diamond micro system for bio-chemistry, 722

Diamond mirrors
CVD diamond optics for ultraviolet, 736

Diamond photodetector

High-speed diamond photoconductors: a solution for high rep-rate deep-UV laser applications, 650

Diamond properties and applications
Lapping performance guide of poly-crystal diamond particles through morphological analysis, 376
Luminescence study of polycrystalline CVD diamond films containing a small amount of nitrogen, 542
CVD-diamond optical lenses, 557
CVD-diamond optical lenses, 557
Electrical AC behaviour of MPCVD diamond Schottky diodes, 615
Dispersion of surface acoustic waves in polycrystalline diamond plates, 686
Fracture toughness of the interface between CVD diamond film and silicon substrate in the relation with methane concentration in the source gas mixture, 760
Wettability of HF-CVD diamond films, 781
Effect of WC-Co substrates pre-treatment and microstructure on the adhesive toughness of CVD diamond, 786
Characteristics of low field-emission diamond films by scanning probe microscopy (SPM), 829

Diamond sensor
CVD diamond sensors for charged particle detection, 1778

Diamond surfaces
The correlation between surface conductivity and adsorbate coverage on diamond as studied by infrared spectroscopy, 429

Diamond thin films
Ultrananocrystalline diamond thin films for MEMS and moving mechanical assembly devices, 1952

Diamond-coated tools
MPCVD diamond tool cutting-edge coverage: dependence on the side wedge angle, 803

Diamond-film
Phosphorus site after CIRA implantation of type IIa diamond, 580

Diamond-like amorphous carbon (DAC)
A review of the effects of carbon self-implantation into amorphous carbon, 224

Diamond-like carbon
Diamond-like carbon applications in high density hard disc recording heads, 271
The sp^3 bond fraction in carbon films prepared by mass-separated ion beam deposition, 895
Influence of ambient gas on diamond-like carbon films prepared by KrF pulsed laser deposition, 900
DLC films prepared by electron evaporation of graphite in an ECR plasma, 915
Comparison of diamond-like carbon films synthesized by 2.45 GHz microwave and 13.56 MHz multi-jet radiofrequency plasma sources, 920
Direct ion beam deposition of hard (> 30 GPa) diamond-like films from RF inductively coupled plasma source, 931
Study of plasma efficiency as a function of arc current in filtered cathodic vacuum arc systems, 947
Hydrogen and disorder in diamond-like carbon, 965
Hydrogen effects on the post-production modification of diamond-like carbon produced by pulsed laser deposition, 970
Wet etching of hydrogenated amorphous carbon films, 976
Phosphorus doping and defect studies of diamond-like carbon films by pulsed laser deposition using camphoric carbon target, 984
Optical and structural properties of nitrogen doped amorphous carbon films grown by rf plasma-enhanced CVD, 1002
Thermostable resistors based on diamond-like carbon films deposited by CVD method, 1007
Comparison of deposition methods for ultra thin DLC overcoat film for MR head, 1017
Observation of photodiode and electroluminescence effects for a-C/a-C:H multilayer nanostructures on silicon, 1040
Mechanical and tribological characterization of diamond-like carbon coatings on orthopedic materials, 1043
Tribological and mechanical properties of diamond-like carbon prepared by high-density plasma, 1063
Hardness, intrinsic stress, and structure of the a-C and a-C:H films prepared by magnetron sputtering, 1076
Ar-dilution effects on the elastic and structural properties of hydrogenated hard carbon films deposited by plasma-enhanced chemical vapor deposition, 1088
Adhesion properties of diamond-like coated orthopaedic biomaterials, 1098
Internal stresses in ta-C films deposited by pulse arc discharge method, 1103
Colour carbon coatings, 1121
Microstructure and adhesion characteristics of diamond-like carbon films deposited on steel substrates, 1528
Effect of adhesion strength of DLC to steel on the coating erosion mechanism, 1824
Diamond-like carbon by pulsed laser deposition from a camphoric carbon target: effect of phosphorus incorporation, 1839
Diamond-like carbon films in multilayered interference coatings for IR optical elements, 1846
Biaxial elastic modulus of very thin diamond-like carbon (DLC) films, 2069
Influence of substrate treatment on the tribological properties of DLC coatings, 2232

Diamond-like carbon (DLC)
Dual ion plasma-beam sources used to maximise sp^3 C–C bonds in carbon nitride, 1125
Nano-scratch and fretting wear study of DLC coatings for biomedical application, 1448
Wear-resistant multilayered diamond-like carbon coating prepared by pulse biased arc ion plating, 1850
Mechanical and tribological properties of diamond-like carbon films prepared on steel by ECR-CVD process, 1855

Diamond-like carbon coating
Calculation of the elastic-stressed state under concentrated loading in diamond-like–metal substrate system, 1829

Diamond-like carbon films
Effects of SiO_x-incorporation hydrocarbons on the tibological properties of DLC films, 1058
Properties of diamond-like carbon films on crystalline quartz and lithium niobate, 1843
Mechanical properties of DLC films prepared in acetylene and methane plasmas using electron cyclotron resonance microwave plasma chemical vapor deposition, 1862

Dielectric
Amorphous carbon based materials as the interconnect dielectric in ULSI chips, 234

Dielectric constant
Synthesis of boron nitride film with low dielectric constant for its application to silicon ultralarge scale integrated semiconductors, 1375

Diffusion
Vacancy diffusion and trapping in electron-irradiated type IaA diamonds, 87
Hydrogen-acceptor interactions in diamond, 399
Hydrogen diffusion and stability in polycrystalline CVD undoped

diamond, 405
The effects of pre-treatment and catalyst composition on growth of carbon nanofibers at low temperature, 1241
EPR and optical imaging of the growth-sector dependence of radiation-damage defect production in synthetic diamond, 1681

Diffusion barrier layer
Adherent diamond coatings on cemented carbide substrates with different cobalt contents, 1700

Dislocations
Observation of etch channels in several natural diamonds, 68

Dissolution
Observation of etch channels in several natural diamonds, 68

DLC
Metal-containing amorphous carbon film development using electron cyclotron resonance CVD, 132
Amorphous carbon based materials as the interconnect dielectric in ULSI chips, 234
Enhancement of the electrophotographic properties of DLC coated OPC drums by oxygen addition, 2063

DLC film
Experimental and numerical study on pulsed-laser annealing process of diamond-like carbon thin films, 905
A study of microstructure and nanomechanical properties of silicon incorporated DLC films deposited on silicon substrates, 1070

DNA
Diamond micro system for bio-chemistry, 722

Dopant
The search for donors in diamond, 1749

Doping
High quality homoepitaxial CVD diamond for electronic devices, 281
Group III–V impurities in β-SiC: lattice distortions and solubility, 1278
The ohmic character of doped AlN films, 1322
Using ion implantation to dope diamond — an update on selected issues, 1756

Doping *n*-type
Phosphorus site after CIRA implantation of type IIa diamond, 580

Double-layer mask
Selective deposition of diamond films on insulators by selective seeding with a double-layer mask, 1573

Drawing die
Fabrication and application of chemical vapor deposition diamond-coated drawing dies, 33

Dry sliding
Low friction ta-C films with hydrogen reservoirs, 1030

Dynamic stress profile
Growth of cubic boron nitride films by ibad and triode sputtering: development of intrinsic stress, 2167

ECR plasma
DLC films prepared by electron evaporation of graphite in an ECR plasma, 915

ECR-CVD method
Field emission and structure of aligned carbon nanofibers deposited by ECR-CVD plasma method, 254

EELS
Structure analysis of cBN films prepared by DC jet plasma CVD from an $Ar–N_2–BF_3–H_2$ gas system, 1881
Vibrational studies of microcrystalline diamond and diamond-like carbon by high resolution electron energy loss spectroscopy, 1991

Effective mass
Low temperature excitation spectrum of phosphorus in diamond, 444

Effective modulus
Bonding characterization and nano-indentation study of the amorphous SiC_xN_y films with and without hydrogen incorporation, 1916

Elastic modulus
Nanoindentation of CVD diamond: comparison of an FE model with analytical and experimental data, 765
Biaxial elastic modulus of very thin diamond-like carbon (DLC) films, 2069
Characterization of AFM cantilevers coated with diamond-like carbon, 2190
Mechanical properties and characterisation of very thin CN_x films synthesised by IBAD, 2199

Elastic properties
Dispersion of surface acoustic waves in polycrystalline diamond plates, 686

Elastic recoil detection analysis
X-Ray reflectometry study of diamond-like carbon films obtained by plasma-assisted chemical vapor deposition, 1491

Elastic-stressed state
Calculation of the elastic-stressed state under concentrated loading in diamond-like–metal substrate system, 1829

Electrical
Metal-containing amorphous carbon film development using electron cyclotron resonance CVD, 132

Electrical breakdown
The insulating properties of a-C:H on silicon and metal substrates, 216

Electrical conductivity
Injection dependent long carrier lifetimes in high quality CVD diamond, 574

Electrical double-layer capacitor
Electrochemical characterization of nanoporous honeycomb diamond electrodes in non-aqueous electrolytes, 620

Electrical properties
Hydrogen diffusion in B-ion-implanted and B-doped homo-epitaxial diamond: passivation of defects vs. passivation of B acceptors, 453
Electrical properties of thick boron and nitrogen contained CVD diamond films, 593
Electrical AC behaviour of MPCVD diamond Schottky diodes, 615
Trapping–detrapping behavior in CVD diamond particle detectors, 645
MPACVD diamond films for surface acoustic wave filters, 681
Influence of metal–diamond interfaces on the response of UV photoconductors, 698
Use of high-sensitivity diamond detectors in DC mode for detailed beam-profile measurements in particle accelerators, 706
Electrical characterization of CVD diamond–n^+ silicon junctions, 858
The effect of film resistance on electron field emission from amorphous carbon films, 868
Switching phenomena in boron-implanted amorphous carbon films,

1036

Electro-mechanical micro devices
Diamond electro-mechanical micro devices — technology and performance, 1684

Electrochemistry
Electrochemical characterization of nanoporous honeycomb diamond electrodes in non-aqueous electrolytes, 620
Relationships between surface character and electrochemical processes on diamond electrodes: dual roles of surface termination and near-surface hydrogen, 1804

Electrode arrangement
Electrochemical behaviour of electrodes assembled with Ti-containing diamond films, 627

Electrodes
New directions in structuring and electrochemical applications of boron-doped diamond thin films, 1799

Electroetching
A study on the conduction path in undoped polycrystalline diamond films, 2174

Electroluminescence
Observation of photodiode and electroluminescence effects for a-C/a-C:H multilayer nanostructures on silicon, 1040

Electron affinity
An investigation of the surface reactivity of diamond photocathodes with molecular and atomic oxygen species, 710

Electron cyclotron heating
MPACVD-diamond windows for high-power and long-pulse millimeter wave transmission, 1692

Electron cyclotron resonance
Mechanical properties of DLC films prepared in acetylene and methane plasmas using electron cyclotron resonance microwave plasma chemical vapor deposition, 1862
A comparative study of Ar and H_2 as carrier gases for the growth of SiC films on Si(100) by electron cyclotron resonance chemical vapor deposition at low temperature, 2075

Electron cyclotron resonance (ECR)
Mechanical and tribological properties of diamond-like carbon films prepared on steel by ECR-CVD process, 1855

Electron donor
The search for donors in diamond, 1749

Electron emission
Field emission from nano-cluster carbon films, 260
Imaging electron emission from diamond film surfaces: N-doped diamond vs. nanostructured diamond, 1714

Electron energy loss spectroscopy
Recovery of diamond after irradiation at high energy and annealing, 82
Chemisorption of O_2 and CO on the K-modified diamond (100)2 × 1 surface, 2049
Field emission of polycrystalline diamond films grown by microwave plasma chemical vapor deposition. II. Effect of p-type doping in diamond, 2118

Electron energy loss spectroscopy (EELS)
The sp^3 bond fraction in carbon films prepared by mass-separated ion beam deposition, 895

Electron energy-loss spectroscopy
Formation of Si clusters in electron-irradiated SiC studied by electron energy-loss spectroscopy, 1251

Electron irradiation damage
Formation of Si clusters in electron-irradiated SiC studied by electron energy-loss spectroscopy, 1251

Electron microscopy
Formation of Si clusters in electron-irradiated SiC studied by electron energy-loss spectroscopy, 1251
The roles of argon addition in the hot filament chemical vapor deposition system, 1523

Electron microscopy, Graphite, In-situ, Ion implantation
Nucleation of carbon onions and nanocapsules under ion implantation at high temperature, 1201

Electron paramagnetic resonance
Characterisation of defects in amorphous carbon by electron paramagnetic resonance, 174

Electron spectroscopy
A complementary study of bonding and electronic structure of amorphous carbon films by electron spectroscopy and optical techniques, 960

Electron spin resonance
Electronic properties of hydrogenated amorphous carbon films deposited using ECR-RF plasma method, 200

Electron- or ion-assisted deposition
Spectroscopic ellipsometry studies of nanocrystalline carbon thin films deposited by HFCVD, 1968

Electronic passivation
Hydrogenation of 6H-SiC as a surface passivation stable in air, 1291

Electronic properties
Electronic properties of hydrogenated amorphous carbon films deposited using ECR-RF plasma method, 200
Electronic properties of carbon nanotubes with pentagon–heptagon pair defects, 1818

Electronic states
Electronic energy spectrum of nitride single heterostructure field effect transistors, 1340

Electronic states density
Relations between the deposition conditions, the microstructure and the defects in PECVD hydrogenated amorphous carbon films; influence on the electronic density of states, 182

Electronic structure
Vibrational studies of microcrystalline diamond and diamond-like carbon by high resolution electron energy loss spectroscopy, 1991

Electronic transport
Electronic transport, photoconductivity and photoluminescence in amorphous carbons, 207

Electrophotographic properties
Enhancement of the electrophotographic properties of DLC coated OPC drums by oxygen addition, 2063

Electroplating
A study on the conduction path in undoped polycrystalline diamond films, 2174

Ellipsometry
Real-time monitoring, growth kinetics and properties of carbon based materials deposited by sputtering, 117
DLC films prepared by electron evaporation of graphite in an ECR plasma, 915
A complementary study of bonding and electronic structure of

amorphous carbon films by electron spectroscopy and optical techniques, 960
Multichannel ellipsometry from 1.5 to 6.5 eV for real time characterization of wide band gap materials: phase identification in boron nitride thin films, 1304
Spectroscopic ellipsometry studies of nanocrystalline carbon thin films deposited by HFCVD, 1968

Emission current
Novel plasma chemical vapor deposition method of carbon nanotubes at low temperature for field emission display application, 248

Emission properties
Similarity in field electron emission from nanocrystalline diamond and related materials, 1719

Emission site size
Spatial variation of field emission current on nitrogen-doped diamond-like carbon surfaces by scanning probe method, 863

Emitter array
Anisotropic etching of a fine column on a single crystal diamond, 1732

Enhanced diamond nucleation
Influence of nitrided and carbonitrided interlayers on enhanced nucleation of diamond on stainless steel 304, 1983

Epitaxial
Silicon substrate preparation for epitaxial diamond crystals, 300

Epitaxial films
Near band-edge transitions in AlN thin films grown on different substrates, 1300

Epitaxial growth
Epitaxial growth of β-SiC on Si (100) by low energy ion beam deposition, 1927

Epitaxy
The role of methyl radicals and acetylene in [100] vs. [111] diamond growth, 1627
Growth of {111}-oriented diamond on Pt/Ir/Pt substrate deposited on sapphire, 1633

Erbium
The interfacial properties of erbium films on the two polar faces of 6H-SiC(0001), 13

Erosion mechanism
Effect of adhesion strength of DLC to steel on the coating erosion mechanism, 1824

Etch figures
Observation of etch channels in several natural diamonds, 68

Etching
Hydrogen effects on the post-production modification of diamond-like carbon produced by pulsed laser deposition, 970
Wet etching of hydrogenated amorphous carbon films, 976
Comparative aspects of the homogeneous degradation of c-BN and diamond, 1390
Formation of fibrous structures on diamond by hydrogen plasma treatment under DC bias, 2039

Excimer laser
Temporal response of UV sensors made of highly oriented diamond films by 193 and 313 nm laser pulses, 1794

Excimer laser irradiation
Diamond photoconductors: operational lifetime and radiation hardness under deep-UV excimer laser irradiation, 715

Exciton
Evidence for excitonic behavior of photoluminescence in polymer-like a-C:H films, 168

Exciton emission
Recovery treatments for ion-induced defects in high-quality homoepitaxial CVD diamond, 322

Excitons
Near band-edge transitions in AlN thin films grown on different substrates, 1300

Face-centred cubic crystal structure
A new carbon modification: 'n-diamond' or face-centred cubic carbon?, 99

FCVA
Mechanical and tribological characterization of diamond-like carbon coatings on orthopedic materials, 1043

FEM
Experimental and numerical study on pulsed-laser annealing process of diamond-like carbon thin films, 905

FET
Electronic energy spectrum of nitride single heterostructure field effect transistors, 1340

FIB (focused ion beam)
Recovery treatments for ion-induced defects in high-quality homoepitaxial CVD diamond, 322

Fibers
Formation of fibrous structures on diamond by hydrogen plasma treatment under DC bias, 2039

Field electron emission
Surface engineering of diamond tips for improved field electron emission, 2178

Field emission
Field emission and structure of aligned carbon nanofibers deposited by ECR-CVD plasma method, 254
Microscopic study of field emission from diamond particles, 818
Characteristics of low field-emission diamond films by scanning probe microscopy (SPM), 829
Fabrication and characterization of phosphorus-doped diamond field emitters in triode-type field emission arrays, 834
Diamond/sp^2-bonded carbon structures: quantum well field electron emission?, 840
Effect of non-diamond carbon etching on the field emission property of highly sp^2 bonded nanocrystalline diamond films, 847
Spatial variation of field emission current on nitrogen-doped diamond-like carbon surfaces by scanning probe method, 863
The effect of film resistance on electron field emission from amorphous carbon films, 868
Current-induced conditioning of hydrogenated amorphous carbon thin films for field emission, 873
Oriented carbon microfibers grown by catalytic decomposition of acetylene and their field emission properties, 878
Electron field emission from carbon films grown from pyrolysis of kerosene, 883
Field emission studies of low-temperature thermal annealing of nitrogen-doped hydrogenated amorphous carbon (a-C:H:N) films, 889
Field emission from tetrahedral amorphous carbon films with various surface morphologies, 1515
Field emission properties of diamond and carbon nanotubes, 1709
Field emission from metal-containing amorphous carbon composite films, 1727

CVD diamond for components and emitters, 1736
Characteristics of Si—C—N films deposited by microwave plasma CVD on Si wafers with various buffer layer materials, 1910
Nano-structured nitrogenated carbon films — morphology and field emission, 1962
Field emission from patterned carbon nanotube emitters produced by microwave plasma chemical vapor deposition, 2157

Field emission displays
Field emission from nano-cluster carbon films, 260
Application of carbon nanotubes to field emission displays, 265
An under-gate triode structure field emission display with carbon nanotube emitters, 1705

Field emission property
Patterned growth and field emission properties of vertically aligned carbon nanotubes, 1457

Field-effect transistors
Potential applications of surface channel diamond field-effect transistors, 1743

Field-emission
Field- and photo-emission properties of CVD-diamond with different microcrystalline structure, 852

Film
Fracture toughness of the interface between CVD diamond film and silicon substrate in the relation with methane concentration in the source gas mixture, 760

Film adhesion
Influence of nitrided and carbonitrided interlayers on enhanced nucleation of diamond on stainless steel 304, 1983

Film nucleation
Diamond growth reactor chemistry and film nucleation enhancement using chlorinated hydrocarbons, 1497

Film structure
Structure analysis of cBN films prepared by DC jet plasma CVD from an $Ar-N_2-BF_3-H_2$ gas system, 1881

Filtered cathodic vacuum arc
Hard carbon nanocomposite films with low stress, 1082
Properties of aluminium nitride coating obtained by vacuum arc discharge method with plasma flow separation, 1314
Field emission from metal-containing amorphous carbon composite films, 1727
Deposition of iron containing amorphous carbon films by filtered cathodic vacuum arc technique, 2018
Influence of nitrogen ion energy on the Raman spectroscopy of carbon nitride films, 2137

First-order and second order Raman
Field emission and structure of aligned carbon nanofibers deposited by ECR-CVD plasma method, 254

Floating potential
Internal stresses in ta-C films deposited by pulse arc discharge method, 1103

Fluid
Diamond and graphite crystallization from C–O–H fluids under high pressure and high temperature conditions, 2131

Fluorin
Fluorine incorporation into amorphous hydrogenated carbon films deposited by plasma-enhanced chemical vapor deposition: structural modifications investigated by X-ray photoelectron spectrometry and Raman spectroscopy, 910

Fluorinated diamond-like coatings
Heat resistance of fluorinated diamond-like carbon films, 1486

Fluorine
Film growth and relationship between microstructure and mechanical properties of a-C:H:F films deposited by PECVD, 125
Characterization of diamond fluorinated by glow discharge plasma treatment, 490
The introducing of fluorine into the deposition of BN: a successful method to obtain high-quality, thick cBN films with low residual stress, 1868

Fourier transform infrared
Synthesis of boron nitride film with low dielectric constant for its application to silicon ultralarge scale integrated semiconductors, 1375

Fourier transformation (DFT and FFT)
Lapping performance guide of poly-crystal diamond particles through morphological analysis, 376

Fowler–Nordheim
The effect of film resistance on electron field emission from amorphous carbon films, 868

Fowler–Nordheim injection
Field- and photo-emission properties of CVD-diamond with different microcrystalline structure, 852
Dielectric characteristics of AlN films grown by d.c.-magnetron sputtering discharge, 1317

Fracture strength and toughness
Accurate measurement of strength and fracture toughness for miniature-size thick diamond-film samples by three-point bending at constant loading rate, 770

Free exciton emission
High quality homoepitaxial CVD diamond for electronic devices, 281

Free standing
Analysis of piezoresistive properties of CVD-diamond films on silicon, 1670

Free-over hang method
Biaxial elastic modulus of very thin diamond-like carbon (DLC) films, 2069

Free-standing
Epitaxially grown free-standing diamond platelet, 2153

Free-standing diamond films
Free-standing diamond films grown on cobalt substrates, 316

Freestanding diamond films
Accurate measurement of strength and fracture toughness for miniature-size thick diamond-film samples by three-point bending at constant loading rate, 770

Friction
Tribological properties of NCD coated cemented carbides in contact with wood, 1
Diamond-like-carbon and molybdenum disulfide nanotribology studies using atomic force measurements, 1049
The structure and tribological property of amorphous carbon and carbon nitride films prepared by ECR plasma sputtering method, 1093
Characterization of nanocrystalline diamond films implanted with nitrogen ions, 1441
Mechanical and tribological properties of diamond-like carbon films prepared on steel by ECR-CVD process, 1855

FTIR ellipsometry
A study on the bonding structure and mechanical properties of magnetron sputtered CN_x thin films, 1179

Fullerene
Deposition of functional carbon compound thin films by synchrotron radiation ablation, 937
AFM investigation of growth process of C_{60} thin films on a KBr(001) surface, 980

Gallium nitride
Oriented growth of diamond on (0001) surface of hexagonal GaN, 1343

Gallium nitride (GaN)
Subbandgap absorption from photocurrent spectra in $Al_{0.18}GaN$/-GaN heterostructures, 1331

GaN
Laser annealing of low temperature grown gallium nitride, 1311

Gas recycling
Large area high quality diamond film deposition by high power DC arc plasma jet operating at gas recycling mode, 1551

Gate arrays
Applications of tetrahedral amorphous carbon in limited volatility memory and in field programmable gate arrays, 230

Graded-morphology
A study of the crystalline growth of highly boron-doped CVD diamond: preparation of graded-morphology diamond thin films, 306

Grain boundary
Origin of band-A emission in homoepitaxial diamond films, 526
Structure of unepitaxial crystallites in a homoepitaxial diamond film, 2096

Grain size
High compressive stress in nanocrystalline diamond films grown by microwave plasma chemical vapor deposition, 352
Growth of nanocrystalline diamond films by biased enhanced microwave plasma chemical vapor deposition, 1592
Growth of detector grade CVD diamond films and microscopic interpretation of their efficiency and charge collection distance in the normal and pumped states, 1783
Structure analysis of cBN films prepared by DC jet plasma CVD from an $Ar-N_2-BF_3-H_2$ gas system, 1881

Graphite
Optical third-harmonic generation from an array of aligned carbon nanotubes with randomly distributed diameters, 27
Diamond film growth in an oxygen atmosphere, 295

Graphite nanofibers
Preparation, morphology and microstructure of segmented graphite nanofibers, 2057

Graphitisation
C^+-damaged diamond: electrical measurements after rapid thermal annealing to 500°C, 463

Growth
MPCVD diamond tool cutting-edge coverage: dependence on the side wedge angle, 803

Gyrotrons
MPACVD-diamond windows for high-power and long-pulse millimeter wave transmission, 1692

h-BN
Nucleation of c-BN from PECVD and TACVD growth species: a theoretical study, 1363

Halogen
Influence of CF_4 addition for HFCVD diamond growth on silicon nitride substrates, 2002

Halogenated precursors
Low temperature CVD diamond deposition using halogenated precursors — deposition on low melting materials: Al, Zn and glass, 347

Hard materials
Micromechanical and microtribological properties of BCN thin films near the B_4C composition deposited by r.f. magnetron sputtering, 1892

hardmetal
Diamond deposition on hardmetal substrates after pre-treatment with aluminium or aluminium compounds, 790

Hardness
Study of the mechanical properties of tetrahedral amorphous carbon films by nanoindentation and nanowear measurements, 145
Smooth fine-grained diamond coatings on titanium alloy for mechanical applications, 337
Deposition of alumina coatings on monocrystalline diamonds by sol–gel techniques, 515
Nanoindentation of CVD diamond: comparison of an FE model with analytical and experimental data, 765
Mechanical and tribological characterization of diamond-like carbon coatings on orthopedic materials, 1043
Amorphous Si_xC_{1-x} films: an example of materials presenting low indentation hardness and high wear resistance, 1053
Hardness, intrinsic stress, and structure of the a-C and a-C:H films prepared by magnetron sputtering, 1076
Hard carbon nanocomposite films with low stress, 1082
Chemical bonding and nanomechanical studies of carbon nitride films synthesised by reactive pulsed laser deposition, 1109
Heat resistance of fluorinated diamond-like carbon films, 1486
Mechanical properties of a-C:H multilayer films, 1833
Bonding characterization and nano-indentation study of the amorphous SiC_xN_y films with and without hydrogen incorporation, 1916
Mechanical properties and characterisation of very thin CN_x films synthesised by IBAD, 2199
Mechanical properties of cubic BC_2N, a new superhard phase, 2228

Hardness of BN
Is there a new form of boron nitride with extreme hardness?, 2010

Heat resistance
Heat resistance of fluorinated diamond-like carbon films, 1486

Heat spreader applications
Thermal conductivity measurements on CVD diamond, 731

Heated filament CVD
The roles of argon addition in the hot filament chemical vapor deposition system, 1523

Heavy-ion timing detectors
The use of CVD-diamond for heavy-ion detection, 1770

Hetero-epitaxy
Synthesis of highly oriented CVD diamond films by ultra short bias enhanced nucleation step, 1637
Epitaxially grown free-standing diamond platelet, 2153

Heteroepitaxy
Diamond film growth in an oxygen atmosphere, 295

AFM investigation of growth process of C_{60} thin films on a KBr(001) surface, 980
First stages of diamond nucleation on iridium buffer layers, 1617
Angle-dependent reflectometry as a technique for fast assessment of highly oriented diamond film quality, 2092

Heterojunction
Electrical characterization of CVD diamond–n^+ silicon junctions, 858
Density of gap states in amorphous hydrogenated silicon carbide determined using high-frequency capacitance-voltage measurement technique, 1273

Hexamethylsiloxane reactants
Effects of SiO_x-incorporation hydrocarbons on the tibological properties of DLC films, 1058

HF-CVD diamond films
Wettability of HF-CVD diamond films, 781

HFCVD
Characterization of diamond fluorinated by glow discharge plasma treatment, 490

High energy electron diffraction
Atomic hydrogen beam etching of carbon superstructures on 6H-SiC (0001) studied by reflection high-energy electron diffraction, 1218

High power millimeter waves
MPACVD-diamond windows for high-power and long-pulse millimeter wave transmission, 1692

High pressure
Superhard and superelastic films of polymeric C_{60}, 2044

High pressure and high temperature
Reactions between carbon and a reduced C–O–H fluid under diamond-stable HP–HT condition, 2125

High pressure/high temperature
Photoluminescence excitation study of cobalt-related optical centers in high-pressure high-temperature diamond, 59

High pressure/high temperature synthesis
The effect of metal–solvent properties on the alteration of specific zones on a carbon phase diagram, 1597

High quality diamond
Recovery treatments for ion-induced defects in high-quality homoepitaxial CVD diamond, 322

High resolution electron microscopy
The influence of the h-BN morphology and structure on the c-BN growth, 1352

High resolution transmission electron microscopy
Recovery of diamond after irradiation at high energy and annealing, 82

High-density plasma
Tribological and mechanical properties of diamond-like carbon prepared by high-density plasma, 1063

Highly boron-doped diamond film
A study of the crystalline growth of highly boron-doped CVD diamond: preparation of graded-morphology diamond thin films, 306

Highly oriented diamond
Temporal response of UV sensors made of highly oriented diamond films by 193 and 313 nm laser pulses, 1794

Hip prostheses
Amorphous carbon as a bio-mechanical coating — mechanical properties and biological applications, 153

Homoepitaxial
Cross-sectional TEM study of unepitaxial crystallites in a homoepitaxial diamond film, 2030
Structure of unepitaxial crystallites in a homoepitaxial diamond film, 2096

Homoepitaxial growth
High quality homoepitaxial CVD diamond for electronic devices, 281

Homoepitaxy
Unusual RHEED patterns of a homoepitaxial diamond (001) surface explained by surface tilt, 1655

Homoepitaxy (p-type)
Hydrogen diffusion in B-ion-implanted and B-doped homo-epitaxial diamond: passivation of defects vs. passivation of B acceptors, 453

Hot filament
Fabrication and application of chemical vapor deposition diamond-coated drawing dies, 33

Hot-filament CVD
Experimental data vs. 3-D model calculations of HFCVD processes: correlations and discrepancies, 364

HP-HT experiment
Diamond and graphite crystallization from C–O–H fluids under high pressure and high temperature conditions, 2131

HP/HT synthesis
High pressure synthesis of cubic boron nitride from Si-hBN system, 1465

HPHT diamond
Change of luminescence character of Ib diamonds with HPHT treatment, 1665

HPHT diamond growth
High-pressure synthesis and characterization of diamond from a sulfur–carbon system, 2145

Humidity effects
Diamond-like-carbon and molybdenum disulfide nanotribology studies using atomic force measurements, 1049

Hydrocarbon chemistry
Experimental data vs. 3-D model calculations of HFCVD processes: correlations and discrepancies, 364

Hydrogen
Hydrogen-acceptor interactions in diamond, 399
Hydrogen diffusion and stability in polycrystalline CVD undoped diamond, 405
Ion channeling studies of hydrogen in homoepitaxially grown CVD diamond, 411
Hydrogen diffusion in B-ion-implanted and B-doped homo-epitaxial diamond: passivation of defects vs. passivation of B acceptors, 453
Nitrogen incorporation in CVD diamond, 485
Energy distribution of thermally emitted negative particles from type Ia diamond (100), 496
Spectroscopic investigations of diamond/hydrogen/metal and diamond/metal interfaces, 506
Effect of high temperature annealing on optical and thermal properties of CVD diamond, 546
Deep level transient spectroscopy of CVD diamond: the observation of defect states in hydrogenated films, 610

Space charge spectroscopy of diamond, 639
Hydrogen and disorder in diamond-like carbon, 965
NEXAFS characterization of nanostructured carbon thin-films exposed to hydrogen, 1195
Thermal oxidation of polymer-like amorphous $Si_xC_yH_wO_z$ nanoparticles, 1295
X-Ray reflectometry study of diamond-like carbon films obtained by plasma-assisted chemical vapor deposition, 1491
Correlation between hydrogen content and structure of pulsed laser deposited carbon nitride films, 2107

Hydrogen bonding
The correlation between surface conductivity and adsorbate coverage on diamond as studied by infrared spectroscopy, 429

Hydrogen content
Low friction ta-C films with hydrogen reservoirs, 1030

Hydrogen etching
Atomic hydrogen beam etching of carbon superstructures on 6H-SiC (0001) studied by reflection high-energy electron diffraction, 1218

Hydrogen plasma
A new carbon modification: 'n-diamond' or face-centred cubic carbon?, 99
Formation of fibrous structures on diamond by hydrogen plasma treatment under DC bias, 2039

Hydrogen terminated surface conductive layer
Potential applications of surface channel diamond field-effect transistors, 1743

Hydrogen termination
Hydrogenation of 6H-SiC as a surface passivation stable in air, 1291

Hydrogenated amorphous carbon
The insulating properties of a-C:H on silicon and metal substrates, 216

Hydrogenated amorphous silicon carbide
Post-growth rapid thermal annealing effect on hydrogenated amorphous silicon carbide thin film, 1268

Hydrogenation process
Carrier generation within the surface region of hydrogenated thin film polycrystalline diamond, 423

i-Carbon
Recovery of diamond after irradiation at high energy and annealing, 82

IBAD
Mechanical properties and characterisation of very thin CN_x films synthesised by IBAD, 2199

Illumination
Positron annihilation study of vacancies in type IIa diamonds illuminated with monochromatic light, 2113

Impedance spectroscopy
A study on the conduction path in undoped polycrystalline diamond films, 2174

Implantation
Low temperature synthesis of P-SiC by a metal vapor vacuum arc ion source, 2195

Impurities
Optical characterization of some irradiation-induced centers in diamond, 18
Photoluminescence excitation study of cobalt-related optical centers in high-pressure high-temperature diamond, 59
A theoretical study of a sulfur impurity in diamond, 449
Group III–V impurities in β-SiC: lattice distortions and solubility, 1278
Photoconductivity of semi-insulating SiC:⟨V,Al⟩, 2035

Impurity incorporation
Thermoluminescence properties of nitrogen containing chemical vapour deposited diamond films, 2084

In-depth stress profile
Growth of cubic boron nitride films by ibad and triode sputtering: development of intrinsic stress, 2167

Indentation
Comparison of the adhesion of diamond films deposited on different materials, 797

Inductively coupled plasma
Vibrational studies of microcrystalline diamond and diamond-like carbon by high resolution electron energy loss spectroscopy, 1991

Inductively coupled plasma chemical vapour deposition
Preparation of nitrogen-rich CN_x films with inductively coupled plasma CVD and pulsed laser deposition, 1901

Infrared
Hydrogen-acceptor interactions in diamond, 399
Formation and characterisation of c-BN thin films deposited by microwave PECVD, 1369

Infrared absorption
Thermal conductivity measurements on CVD diamond, 731

Interface analysis
Thick, well-adhered, highly stressed tetrahedral amorphous carbon, 1011

Interface toughness
Effect of WC-Co substrates pre-treatment and microstructure on the adhesive toughness of CVD diamond, 786

Intergranular phases
Influence of CF_4 addition for HFCVD diamond growth on silicon nitride substrates, 2002

Internal stress
Hard carbon nanocomposite films with low stress, 1082

Interstitial atoms
Vacancy diffusion and trapping in electron-irradiated type IaA diamonds, 87

Intrinsic stress
Intrinsic stress and stiffness variations in amorphous carbon, 139

Ion assisted deposition
X-Ray absorption studies of cubic boron–carbon–nitrogen films grown by ion beam assisted evaporation, 1165

Ion beam
Epitaxial growth of β-SiC on Si (100) by low energy ion beam deposition, 1927

Ion beam growth
Synthesis of amorphous carbon nitride using reactive ion beam sputtering deposition with grazing bombardment, 2184

Ion beam-assisted deposition (IBAD)
Development of single- and multi-layered metallic films on diamond by ion beam-assisted deposition, 1578

Ion bombarding

Film growth and relationship between microstructure and mechanical properties of a-C:H:F films deposited by PECVD, 125

Ion bombardment
Ion-induced electron emission from Boron-doped diamond: effect of surface hydrogenation and sample temperature, 824
Carbon nitride thin-films deposited from coupled r.f.-magnetron sputtering and ion beam-assisted processes, 1175
Cubic boron nitride film synthesis by reactive sputtering with pulsed RF substrate bias, 1380
First stages of diamond nucleation on iridium buffer layers, 1617
Theoretical analysis of ion bombardment roles in the bias-enhanced nucleation process of CVD diamond, 1622
Synthesis of amorphous carbon nitride using reactive ion beam sputtering deposition with grazing bombardment, 2184

Ion flux
Synthesis and characterization of cubic boron nitride films: substrate bias and ion flux effects, 1886

Ion implantation
A review of the effects of carbon self-implantation into amorphous carbon, 224
Recovery treatments for ion-induced defects in high-quality homoepitaxial CVD diamond, 322
Hydrogen diffusion in B-ion-implanted and B-doped homo-epitaxial diamond: passivation of defects vs. passivation of B acceptors, 453
Phosphorus site after CIRA implantation of type IIa diamond, 580
Formation of a conducting layer by high energy metal ion implantation into diamond, 606
Electron paramagnetic resonance study of ion implantation induced defects in amorphous hydrogenated carbon, 993
Switching phenomena in boron-implanted amorphous carbon films, 1036
Characterization of nanocrystalline diamond films implanted with nitrogen ions, 1441
Using ion implantation to dope diamond — an update on selected issues, 1756
Surface engineering of diamond tips for improved field electron emission, 2178

Ion to deposited atom ratio
Synthesis and characterization of cubic boron nitride films: substrate bias and ion flux effects, 1886

Ion-assisted deposition
Growth of cubic boron nitride films by ibad and triode sputtering: development of intrinsic stress, 2167

Ion-assisted pulsed laser deposition
Pulsed laser deposition of cubic boron nitride films at high growth rates, 1973

Ion-beam
Effect of ion beam nitriding on diamond nucleation and growth onto steel substrates, 1506

Ion-implantation
C^+-damaged diamond: electrical measurements after rapid thermal annealing to 500°C, 463

Ion-induced electron emission
CVD diamond: a novel high γ-coating for plasma display panels?, 809

Ionoluminescence
Ionoluminescence in CVD diamond and in cubic boron nitride, 568

IR
Properties of diamond films deposited by multi-cathode direct current plasma assisted CVD method, 552

IR absorption
High-pressure synthesis and characterization of diamond from a sulfur–carbon system, 2145

IR spectroscopy
The correlation between surface conductivity and adsorbate coverage on diamond as studied by infrared spectroscopy, 429

Iridium
Growth of {111}-oriented diamond on Pt/Ir/Pt substrate deposited on sapphire, 1633

Jewellery
Colour carbon coatings, 1121

Kerosene
Electron field emission from carbon films grown from pyrolysis of kerosene, 883

Kinetics
The role of methyl radicals and acetylene in [100] vs. [111] diamond growth, 1627

Langmuir probe
Quantification of ion bombardment effects in c-BN thin films deposited by rf magnetron sputtering, 1347

Lapping rate
Lapping performance guide of poly-crystal diamond particles through morphological analysis, 376

Large area high quality diamond films
Large area high quality diamond film deposition by high power DC arc plasma jet operating at gas recycling mode, 1551

Large current density
Field emission properties of diamond and carbon nanotubes, 1709

Laser
Diamond film growth in an oxygen atmosphere, 295
Injection dependent long carrier lifetimes in high quality CVD diamond, 574
BN substitution reaction of fullerene using an excimer laser irradiation, 1228
Laser plasma CVD diamond reactor, 1559

Laser ablation
Influence of ambient gas on diamond-like carbon films prepared by KrF pulsed laser deposition, 900
Deposition of cubic boron nitride by laser ablation, 1385

Laser spectroscopy
On the mechanism of CH_3 radical formation in hot filament activated CH_4/H_2 and C_2H_2/H_2 gas mixtures, 358

Localised states
Localisation and density of states in amorphous carbon-based alloys, 191

Low temperature
Molecular beam mass spectrometry investigations of low temperature diamond growth using CO_2/CH_4 plasmas, 393

Low-melting substrates
Low temperature CVD diamond deposition using halogenated precursors — deposition on low melting materials: Al, Zn and glass, 347

Luminescence
Optical characterization of some irradiation-induced centers in

diamond, 18
Evidence for excitonic behavior of photoluminescence in polymer-like a-C:H films, 168
Nitrogen incorporation in CVD diamond, 485

Magnetic property
Synthesis and characterization of cobalt nanoparticles encapsulated in boron nitride nanocages, 1210

Magnetron sputtering
Dielectric characteristics of AlN films grown by d.c.-magnetron sputtering discharge, 1317
Quantification of ion bombardment effects in c-BN thin films deposited by rf magnetron sputtering, 1347
Synthesis and characterization of cubic boron nitride films: substrate bias and ion flux effects, 1886
Chemical bonding in carbon nitride films studied by X-ray spectroscopies, 1897

Mass spectrometry
Molecular beam mass spectrometry investigations of low temperature diamond growth using CO_2/CH_4 plasmas, 393
Deposition of functional carbon compound thin films by synchrotron radiation ablation, 937
BN substitution reaction of fullerene using an excimer laser irradiation, 1228

Mass-separated ion beam deposition (MSIBD)
The sp^3 bond fraction in carbon films prepared by mass-separated ion beam deposition, 895

Master equation
Numerical simulation of I–V characteristics of carbon nanotube based tunneling systems, 1814

Mechanical properties
Study of the mechanical properties of tetrahedral amorphous carbon films by nanoindentation and nanowear measurements, 145

Metallic carbon polymorphs
Is there theoretical evidence for a metallic carbon polymorph with space group symmetry $Fm\bar{3}m$ at ambient conditions?, 2225
Microstructural and mechanical properties of nanometric-multilayered a-CN/a-C/.../a-CN coatings deposited by rf-magnetron sputtering and nitrogen ion-beam bombardment, 952
Mechanical properties of d.c. magnetron-sputtered and pulsed vacuum arc deposited ultra-thin nitrogenated carbon coatings, 1024
Ar-dilution effects on the elastic and structural properties of hydrogenated hard carbon films deposited by plasma-enhanced chemical vapor deposition, 1088
Diamond-like carbon films in multilayered interference coatings for IR optical elements, 1846
Mechanical properties of DLC films prepared in acetylene and methane plasmas using electron cyclotron resonance microwave plasma chemical vapor deposition, 1862
Pulsed laser deposition of cubic boron nitride films at high growth rates, 1973
Mechanical properties of cubic BC_2N, a new superhard phase, 2228

Mechanical strength
The influence of boron compounds' particles (TiB_2, BN^{cub}) on the thermal stability and the mechanical strength of synthesized carbonado after heating, 2024

Mechanism
The role of methyl radicals and acetylene in [100] vs. [111] diamond growth, 1627

Mechanosynthesis
Mechanosynthesis of carbon nitride compounds, 1995

MEMS
Modeling the effect of oxygen on vapor phase diamond deposition inside micro-trenches, 2212

Metal
Synthesis and characterization of cobalt nanoparticles encapsulated in boron nitride nanocages, 1210

Metal semiconductor field effect transistors (MESFET)
Monte Carlo simulation of vertical MESFETs in 2H, 4H and 6H-SiC, 1283

Metal semiconductor field-effect transistor (MESFET)
Heat-spreading diamond films for GaN-based high-power transistor devices, 744

Metal–diamond interface
Spectroscopic investigations of diamond/hydrogen/metal and diamond/metal interfaces, 506

Metal-containing amorphous carbon
Deposition of iron containing amorphous carbon films by filtered cathodic vacuum arc technique, 2018

Metal/BN/metal structure
Study on electrical characteristics of metal/boron nitride/metal and boron nitride/silicon structures, 1404

Metallization
Development of single- and multi-layered metallic films on diamond by ion beam-assisted deposition, 1578

Methane and acetylene plasma
Mechanical properties of DLC films prepared in acetylene and methane plasmas using electron cyclotron resonance microwave plasma chemical vapor deposition, 1862

Methyl radicals
On the mechanism of CH_3 radical formation in hot filament activated CH_4/H_2 and C_2H_2/H_2 gas mixtures, 358

MEVVA
Low temperature synthesis of P-SiC by a metal vapor vacuum arc ion source, 2195

Micro beam analysis
Influence of defect inhomogeneities in high quality natural diamond detectors, 469

Micro diamond
The CVD growth of micro crystals of diamond, 1584

Micro-machining
Wet etching of hydrogenated amorphous carbon films, 976
CVD diamond for components and emitters, 1736

Micro-particle
Microscopic study of field emission from diamond particles, 818

Micro-Raman spectroscopy
Optical characterization of some irradiation-induced centers in diamond, 18
Optical and structural properties of SiC layers grown by an electron cyclotron resonance CVD technique, 1264

Microcrystalline diamond
Structural and optical properties of diamond and nano-diamond films grown by microwave plasma chemical vapor deposition, 561

Microfibers
Oriented carbon microfibers grown by catalytic decomposition of acetylene and their field emission properties, 878

Microstrip lines
New hybrid with Q-factor-pass-band microwave filter constructed with di-electric resonators and coupled with a thick-film microstrip line made in diamond substrates, 1511

Microstructure
Relations between the deposition conditions, the microstructure and the defects in PECVD hydrogenated amorphous carbon films; influence on the electronic density of states, 182
Synthesis and characterization of cobalt nanoparticles encapsulated in boron nitride nanocages, 1210
Paramagnetic defects in silicon carbide grains embedded in SiO_2 matrix, 1287
Synthesis of nanocrystalline diamond films using microwave plasma CVD, 1588
Pulsed laser deposition of cubic boron nitride films at high growth rates, 1973
Correlation between hydrogen content and structure of pulsed laser deposited carbon nitride films, 2107

Microwave
Growth of diamond films by a 5-kW microwave plasma CVD reactor, 312
Diamond films grown by a 60-kW microwave plasma chemical vapor deposition system, 1569

Microwave CVD deposition
Numerical modeling of a microwave plasma CVD reactor, 342

Microwave filters
New hybrid with Q-factor-pass-band microwave filter constructed with di-electric resonators and coupled with a thick-film microstrip line made in diamond substrates, 1511

Microwave plasma
Comparison of diamond-like carbon films synthesized by 2.45 GHz microwave and 13.56 MHz multi-jet radiofrequency plasma sources, 920

Microwave plasma chemical vapor deposition
Oriented growth of diamond on (0001) surface of hexagonal GaN, 1343

Microwave plasma chemical vapor deposition (MPCVD)
Synthesis of high-density carbon nanotube films by microwave plasma chemical vapor deposition, 1947

Microwave plasma CVD
Field emission from patterned carbon nanotube emitters produced by microwave plasma chemical vapor deposition, 2157

Microwave plasma-assisted chemical vapor deposition (MPCVD)
Growth of faceted, ballas-like and nanocrystalline diamond films deposited in $CH_4/H_2/Ar$ MPCVD, 2161

MIS capacitor
Dielectric characteristics of AlN films grown by d.c.-magnetron sputtering discharge, 1317

Mobility lifetime
Electronic properties of CVD polycrystalline diamond films, 588

Model
Calculation of the elastic-stressed state under concentrated loading in diamond-like–metal substrate system, 1829

Modeling
Real-time monitoring, growth kinetics and properties of carbon based materials deposited by sputtering, 117
Interstitial aggregates in diamond, 434
Trapping–detrapping behavior in CVD diamond particle detectors, 645
Spectroscopic ellipsometry studies of nanocrystalline carbon thin films deposited by HFCVD, 1968
Modeling the effect of oxygen on vapor phase diamond deposition inside micro-trenches, 2212

Modelling
Experimental data vs. 3-D model calculations of HFCVD processes: correlations and discrepancies, 364

Modulated photocurrent
Electronic properties of CVD polycrystalline diamond films, 588

Molding technique
CVD-diamond optical lenses, 557
CVD-diamond optical lenses, 557

Monovacancy
Positron annihilation study of vacancies in type IIa diamonds illuminated with monochromatic light, 2113

Morphological defects
Stress related morphological defects in SiC epitaxial layers, 1246

Morphology
Process optimization in the low-pressure flat flame growth of diamond, 289
Microscopic study of field emission from diamond particles, 818
Mechanical and tribological characterization of diamond-like carbon coatings on orthopedic materials, 1043
Formation of silicon carbide and silicon carbonitride by RF-plasma CVD, 1160
Comparative aspects of the homogeneous degradation of c-BN and diamond, 1390

Multi-layer coating
Wear-resistant multilayered diamond-like carbon coating prepared by pulse biased arc ion plating, 1850

Multilayer structures
Observation of photodiode and electroluminescence effects for a-C/a-C:H multilayer nanostructures on silicon, 1040

N-doped
Imaging electron emission from diamond film surfaces: N-doped diamond vs. nanostructured diamond, 1714

n-Type doping
Low temperature excitation spectrum of phosphorus in diamond, 444
A theoretical study of a sulfur impurity in diamond, 449
Fabrication and characterization of phosphorus-doped diamond field emitters in triode-type field emission arrays, 834
Optical and structural properties of nitrogen doped amorphous carbon films grown by rf plasma-enhanced CVD, 1002

Nano-crystalline
The roles of argon addition in the hot filament chemical vapor deposition system, 1523

Nano-honeycomb diamond
Electrochemical characterization of nanoporous honeycomb diamond electrodes in non-aqueous electrolytes, 620

Nano-indentation
Bonding characterization and nano-indentation study of the amorphous SiC_xN_y films with and without hydrogen incorporation, 1916

Nano-scratch
Nano-scratch and fretting wear study of DLC coatings for biomedical application, 1448

Nano-structures
Nano-structured nitrogenated carbon films — morphology and field emission, 1962

Nanocrystalline carbon
Spectroscopic ellipsometry studies of nanocrystalline carbon thin films deposited by HFCVD, 1968

Nanocrystalline diamond
Structural and optical properties of diamond and nano-diamond films grown by microwave plasma chemical vapor deposition, 561
Vibrational studies of microcrystalline diamond and diamond-like carbon by high resolution electron energy loss spectroscopy, 1991

Nanocrystalline diamond films
Characterization of nanocrystalline diamond films implanted with nitrogen ions, 1441

Nanocrystalline diamond layer
Tribological properties of NCD coated cemented carbides in contact with wood, 1

Nanocrystyalline diamond
Growth of faceted, ballas-like and nanocrystalline diamond films deposited in $CH_4/H_2/Ar$ MPCVD, 2161

Nanoindentation
Nanoindentation of CVD diamond: comparison of an FE model with analytical and experimental data, 765
Tribological and mechanical properties of diamond-like carbon prepared by high-density plasma, 1063
A study of microstructure and nanomechanical properties of silicon incorporated DLC films deposited on silicon substrates, 1070
A study on the bonding structure and mechanical properties of magnetron sputtered CN_x thin films, 1179
Nano-scratch and fretting wear study of DLC coatings for biomedical application, 1448
Mechanical properties and characterisation of very thin CN_x films synthesised by IBAD, 2199

Nanoparticles
Thermal oxidation of polymer-like amorphous $Si_xC_yH_wO_z$ nanoparticles, 1295
Nature of confinement of phonons in nanocrystalline CVD diamond, 1477

Nanostructured carbon films
Cluster assembling of nanostructured carbon films, 240

Nanostructured materials
Mechanical properties of nanometric structures of Si/SiC, C/SiC and C/SiN produced by PECVD, 1115

Nanostructures
Structures with a minimum feature size of less than 100 nm in CVD-diamond for sensor applications, 511
Electrical conduction in nanostructured carbon films produced by supersonic cluster beam deposition, 989
Bond modification of BCN films on Ni substrate, 1137
The influence of the h-BN morphology and structure on the c-BN growth, 1352

Nanotube
Synthesis of boron nitride nanotubes and nanocapsules with LaB_6, 1231
Numerical simulation of I–V characteristics of carbon nanotube based tunneling systems, 1814

Nanotubes
Field emission properties of diamond and carbon nanotubes, 1709

Natural diamond
Defects in coloured natural diamonds, 474

Natural diamonds
Observation of etch channels in several natural diamonds, 68

NEA
CVD diamond: a novel high γ-coating for plasma display panels?, 809

Negative electron affinity
UHV μ-electron beam evaluation of the CVD diamond particles grown on Si(001), 48
Energy distribution of thermally emitted negative particles from type Ia diamond (100), 496
Oxygen-induced surface state on diamond (100), 500

New form of boron nitride
Is there a new form of boron nitride with extreme hardness?, 2010

New superhard phase
Mechanical properties of cubic BC_2N, a new superhard phase, 2228

NEXAFS
X-Ray absorption studies of bonding environments in graphitic carbon nitride, 1170

Ni
Microstructured diamond dies for transfer moulding, 7

Nickel
Multi-layer structure for chemical vapor deposition diamond on electroplated diamond tools, 332
Bond modification of BCN films on Ni substrate, 1137

Nitridation
AFM and XPS studies of a homoepitaxial diamond (001) surface nitrided using 500-eV N_2^+ ion beam, 1676

Nitride
The structure and tribological property of amorphous carbon and carbon nitride films prepared by ECR plasma sputtering method, 1093
Bond modification of BCN films on Ni substrate, 1137
The effect of hydrogen- and oxygen-plasma treatments on dielectric properties of amorphous carbon nitride films, 1147

Nitrided interlayers
Influence of nitrided and carbonitrided interlayers on enhanced nucleation of diamond on stainless steel 304, 1983

Nitrides
Diamond UV detectors for future solar physics missions, 673
Chemical bonding and nanomechanical studies of carbon nitride films synthesised by reactive pulsed laser deposition, 1109
Bonding structure of carbon nitride films deposited by reactive plasma beam sputtering, 1142
Comparative study of microstructure in a-C_xN_{1-x} films deposited by radiofrequency magnetron sputtering, 1156
A study on the bonding structure and mechanical properties of magnetron sputtered CN_x thin films, 1179
The ohmic character of doped AlN films, 1322
Density of states distribution in AlN films measured by CPM and DLTS, 1335
Electronic energy spectrum of nitride single heterostructure field effect transistors, 1340
Quantification of ion bombardment effects in c-BN thin films deposited by rf magnetron sputtering, 1347

Nucleation of c-BN from PECVD and TACVD growth species: a theoretical study, 1363
Similarity in field electron emission from nanocrystalline diamond and related materials, 1719

Nitriding
Effect of ion beam nitriding on diamond nucleation and growth onto steel substrates, 1506

Nitrogen
A theoretical study of a sulfur impurity in diamond, 449
EPR study of preferential orientation of crystallites in N-doped high quality CVD diamond, 480
Nitrogen incorporation in CVD diamond, 485
Electrical properties of thick boron and nitrogen contained CVD diamond films, 593
MPACVD diamond films for surface acoustic wave filters, 681
Microstructural and mechanical properties of nanometric-multilayered a-CN/a-C/ . . . /a-CN coatings deposited by rf-magnetron sputtering and nitrogen ion-beam bombardment, 952
Optical and structural properties of nitrogen doped amorphous carbon films grown by rf plasma-enhanced CVD, 1002
Carbon nitride thin-films deposited from coupled r.f.-magnetron sputtering and ion beam-assisted processes, 1175
BN substitution reaction of fullerene using an excimer laser irradiation, 1228
EPR and optical imaging of the growth-sector dependence of radiation-damage defect production in synthetic diamond, 1681
Thermoluminescence properties of nitrogen containing chemical vapour deposited diamond films, 2084

Nitrogen additions
Diamond deposition in a DC-arc Jet CVD system: investigations of the effects of nitrogen addition, 370

Nitrogen doping
Field emission studies of low-temperature thermal annealing of nitrogen-doped hydrogenated amorphous carbon (a-C:H:N) films, 889

Nitrogen impurity
Change of luminescence character of Ib diamonds with HPHT treatment, 1665

Nitrogen-doped DLC
Spatial variation of field emission current on nitrogen-doped diamond-like carbon surfaces by scanning probe method, 863

Nitrogen-related centers
Luminescence study of polycrystalline CVD diamond films containing a small amount of nitrogen, 542

Nitrogenated carbon
Nano-structured nitrogenated carbon films — morphology and field emission, 1962

Noble gases
Influence of stress on the electron core level energies of noble gases implanted in hard amorphous carbon films, 956

Noise figure
Broadband electronics for CVD-diamond detectors, 1765

Non-aqueous electrolyte
Electrochemical characterization of nanoporous honeycomb diamond electrodes in non-aqueous electrolytes, 620

Non-diamond
Effect of non-diamond carbon etching on the field emission property of highly sp^2 bonded nanocrystalline diamond films, 847

Non-wetting
Heat resistance of fluorinated diamond-like carbon films, 1486

ns-Si
Mechanical properties of nanometric structures of Si/SiC, C/SiC and C/SiN produced by PECVD, 1115

ns-SiC
Mechanical properties of nanometric structures of Si/SiC, C/SiC and C/SiN produced by PECVD, 1115

Nucleation
Analysis of diamond nucleation on molybdenum by biased hot filament chemical vapor deposition, 383
Heat-spreading diamond films for GaN-based high-power transistor devices, 744
Catalytic growth mechanism of carbon nanofibers through chemical vapor deposition, 1214
Formation and growth of c-BN films in various conditions: improvement of the adherence, 1357
Nucleation of c-BN from PECVD and TACVD growth species: a theoretical study, 1363
Positive dc bias-enhanced diamond nucleation with high CH_4 concentration, 1470
Early stages of the HFCVD process on multi-vicinal silicon surfaces studied by electron microscopy probes (SEM, TEM), 1612
First stages of diamond nucleation on iridium buffer layers, 1617
Depth resolved stress investigations of c-BN thin films, 1875
Cross-sectional TEM study of unepitaxial crystallites in a homoepitaxial diamond film, 2030

Nucleation and growth
The effect of metal–solvent properties on the alteration of specific zones on a carbon phase diagram, 1597

Numerical modeling
Numerical modeling of a microwave plasma CVD reactor, 342

Off-angle
Unusual RHEED patterns of a homoepitaxial diamond (001) surface explained by surface tilt, 1655

OPC drums
Enhancement of the electrophotographic properties of DLC coated OPC drums by oxygen addition, 2063

Optical
Metal-containing amorphous carbon film development using electron cyclotron resonance CVD, 132

Optical absorbtion
Effect of high temperature annealing on optical and thermal properties of CVD diamond, 546

Optical absorption
Hydrogen and disorder in diamond-like carbon, 965
Photoconductivity of semi-insulating SiC:⟨V,Al⟩, 2035

Optical bandgap
Direct ion beam deposition of hard (> 30GPa) diamond-like films from RF inductively coupled plasma source, 931

Optical diagnostics
Optical diagnostics of an atmospheric pressure diamond-depositing DC plasma reactor, 1565

Optical emission
Diamond deposition in a DC-arc Jet CVD system: investigations of the effects of nitrogen addition, 370

Optical lenses

CVD-diamond optical lenses, 557
CVD-diamond optical lenses, 557

Optical properties
Localisation and density of states in amorphous carbon-based alloys, 191
CVD diamond optics for ultraviolet, 736
Spectroscopic ellipsometric study of tetrahedral amorphous carbon films: optical properties and modelling, 1132
Photoluminescence and infra-red absorption of annealed a-CN_x:H films, 1152

Optical property
Influence of ambient gas on diamond-like carbon films prepared by KrF pulsed laser deposition, 900

Optoelectronic properties
Optical third-harmonic generation from an array of aligned carbon nanotubes with randomly distributed diameters, 27
Diamond-like carbon by pulsed laser deposition from a camphoric carbon target: effect of phosphorus incorporation, 1839

Orientation
EPR study of preferential orientation of crystallites in N-doped high quality CVD diamond, 480
Angle-dependent reflectometry as a technique for fast assessment of highly oriented diamond film quality, 2092

Oriented growth
Oriented growth of diamond on (0001) surface of hexagonal GaN, 1343

Orthopaedic metal substrates
Mechanical and tribological characterization of diamond-like carbon coatings on orthopedic materials, 1043

Oxidation
Mechanistic aspects of the sonoelectrochemical degradation of the reactive dye Procion Blue at boron-doped diamond electrodes, 662
Thermal oxidation of polymer-like amorphous $Si_xC_yH_wO_z$ nanoparticles, 1295

Oxygen
Oxygen-induced surface state on diamond (100), 500
Potassium adsorption on hydrogen- and oxygen-terminated diamond(100) surfaces, 519
The effect of hydrogen- and oxygen-plasma treatments on dielectric properties of amorphous carbon nitride films, 1147
Chemisorption of O_2 and CO on the K-modified diamond (100)2 × 1 surface, 2049
Field emission of polycrystalline diamond films grown by microwave plasma chemical vapor deposition. II. Effect of p-type doping in diamond, 2118

Oxygen addition
Enhancement of the electrophotographic properties of DLC coated OPC drums by oxygen addition, 2063

p-Type doping
Analysis of the Fano in diamond, 531

Particle detector
CVD diamond sensors for charged particle detection, 1778

Passivation
Hydrogen-acceptor interactions in diamond, 399
Hydrogen diffusion in B-ion-implanted and B-doped homo-epitaxial diamond: passivation of defects vs. passivation of B acceptors, 453

Patterned growth
Patterned growth and field emission properties of vertically aligned carbon nanotubes, 1457

Patterning
Surface engineering of diamond tips for improved field electron emission, 2178

Patterns
Field emission from patterned carbon nanotube emitters produced by microwave plasma chemical vapor deposition, 2157

PEA
CVD diamond: a novel high γ-coating for plasma display panels?, 809

PECVD
Film growth and relationship between microstructure and mechanical properties of a-C:H:F films deposited by PECVD, 125
Novel plasma chemical vapor deposition method of carbon nanotubes at low temperature for field emission display application, 248

Peripheral morphology
Lapping performance guide of poly-crystal diamond particles through morphological analysis, 376

pH
pH sensing by surface-doped diamond and effect of the diamond surface termination, 667

Phonon
Phonon-assisted electronic transitions in phosphorus-doped n-type chemical vapor deposition diamond films, 439

Phonons
Analysis of the Fano in diamond, 531
Nature of confinement of phonons in nanocrystalline CVD diamond, 1477

Phosphorus
Phosphorus site after CIRA implantation of type IIa diamond, 580
Cathodoluminescence of phosphorus doped (111) homoepitaxial diamond thin films, 1652
Diamond-like carbon by pulsed laser deposition from a camphoric carbon target: effect of phosphorus incorporation, 1839

Phosphorus doping
Phonon-assisted electronic transitions in phosphorus-doped n-type chemical vapor deposition diamond films, 439
Phosphorus doping and defect studies of diamond-like carbon films by pulsed laser deposition using camphoric carbon target, 984

Photo-electron spectroscopy
Fluorine incorporation into amorphous hydrogenated carbon films deposited by plasma-enhanced chemical vapor deposition: structural modifications investigated by X-ray photoelectron spectrometry and Raman spectroscopy, 910
Comparison of deposition methods for ultra thin DLC overcoat film for MR head, 1017

Photo-emission spectroscopy
Field- and photo-emission properties of CVD-diamond with different microcrystalline structure, 852

Photo-luminescence
Optical and structural properties of SiC layers grown by an electron cyclotron resonance CVD technique, 1264

Photo-luminescent material
Photoluminescence and infra-red absorption of annealed a-CN_x:H

films, 1152

Photoconductivity
Electronic transport, photoconductivity and photoluminescence in amorphous carbons, 207
Phonon-assisted electronic transitions in phosphorus-doped n-type chemical vapor deposition diamond films, 439
Electronic properties of CVD polycrystalline diamond films, 588
Characterisation of silicon carbide detectors response to electron and photon irradiation, 657
Influence of metal–diamond interfaces on the response of UV photoconductors, 698
Thickness dependent density distribution of gap states in undoped CVD diamond films, 998
Photoconductivity of semi-insulating SiC:⟨V,Al⟩, 2035

Photoconductor
Diamond photodetectors for next generation 157-nm deep-UV photolithography tools, 693

Photoconductors
Diamond photoconductors: operational lifetime and radiation hardness under deep-UV excimer laser irradiation, 715

Photodetector
Diamond photodetectors for next generation 157-nm deep-UV photolithography tools, 693

Photodiode
Observation of photodiode and electroluminescence effects for a-C/a-C:H multilayer nanostructures on silicon, 1040

Photoelectrical
An investigation of the surface reactivity of diamond photocathodes with molecular and atomic oxygen species, 710

Photoelectron spectroscopy
The interfacial properties of erbium films on the two polar faces of 6H-SiC(0001), 13

Photoemission
Potassium adsorption on hydrogen- and oxygen-terminated diamond(100) surfaces, 519

Photoexcitation
Pulsed sub-band-gap photoexcitation of AlN, 1326

Photolithography
Diamond photodetectors for next generation 157-nm deep-UV photolithography tools, 693

Photoluminescence
Photoluminescence excitation study of cobalt-related optical centers in high-pressure high-temperature diamond, 59
Consequences of size-effect and spectral inhomogenity on Raman and photoluminescence spectra of a-C:H, 161
Electronic transport, photoconductivity and photoluminescence in amorphous carbons, 207
Luminescence study of polycrystalline CVD diamond films containing a small amount of nitrogen, 542
High quality CVD diamond for detection applications: structural characterization, 1788
Thermoluminescence properties of nitrogen containing chemical vapour deposited diamond films, 2084

Physical vapor deposition
Study of plasma efficiency as a function of arc current in filtered cathodic vacuum arc systems, 947
Formation and growth of c-BN films in various conditions: improvement of the adherence, 1357

Piezoresistivity
Analysis of piezoresistive properties of CVD-diamond films on silicon, 1670

Pixel detector
CVD diamond sensors for charged particle detection, 1778

PLA
Laser annealing of low temperature grown gallium nitride, 1311

Plasma
Detection of C_2 radicals in low-pressure inductively coupled plasma source for diamond chemical vapor deposition, 388
Study of plasma efficiency as a function of arc current in filtered cathodic vacuum arc systems, 947
Laser plasma CVD diamond reactor, 1559
Generation of pulsed direct-current plasma above 100 torr for large area diamond deposition, 2220

Plasma chemical vapor deposition
Structural and optical properties of diamond and nano-diamond films grown by microwave plasma chemical vapor deposition, 561

Plasma CVD
Photoluminescence and infra-red absorption of annealed a-CN_x:H films, 1152

Plasma displays
CVD diamond: a novel high γ-coating for plasma display panels?, 809

Plasma nitriding
Influence of substrate treatment on the tribological properties of DLC coatings, 2232

Plasma processing
Heat resistance of fluorinated diamond-like carbon films, 1486

Plasma-assisted chemical vapor deposition
Synthesis of boron nitride film with low dielectric constant for its application to silicon ultralarge scale integrated semiconductors, 1375

Plasma-enhanced chemical vapor deposition (PECVD)
Mechanical properties of nanometric structures of Si/SiC, C/SiC and C/SiN produced by PECVD, 1115

Plasma-surface-interaction
CVD diamond: a novel high γ-coating for plasma display panels?, 809

Plasmatron
Thermostable resistors based on diamond-like carbon films deposited by CVD method, 1007

Platelets
Interstitial aggregates in diamond, 434

Platinum
Growth of {111}-oriented diamond on Pt/Ir/Pt substrate deposited on sapphire, 1633

PLD
The ohmic character of doped AlN films, 1322

Point defects
Direct ion beam deposition of hard (> 30 GPa) diamond-like films from RF inductively coupled plasma source, 931

Polarization spectroscopy
Evidence for excitonic behavior of photoluminescence in polymer-like a-C:H films, 168

Polishing
The CVD growth of micro crystals of diamond, 1584

Poly-crystalline
The high temperature–high pressure sintering of diamond–Cu–Si–B composite, 1607

Polycrystalline
Diamond synthesis by electrolysis of acetates, 942

Polycrystalline diamond
Electronic properties of CVD polycrystalline diamond films, 588
Field- and photo-emission properties of CVD-diamond with different microcrystalline structure, 852

Polycrystalline diamond (PCD)
Comparison of the creep properties of single crystal and polycrystalline diamond cutting tool materials, 755

Polymer-like amorphous carbon (PAC)
A review of the effects of carbon self-implantation into amorphous carbon, 224

Positron
Negative charging of mono-and divacancies in IIa diamonds by monochromatic illumination, 585

Positron annihilation
Positron annihilation study of vacancies in type IIa diamonds illuminated with monochromatic light, 2113

Preparation
Preparation, morphology and microstructure of segmented graphite nanofibers, 2057

Pressure
Effect of chromium on the kinetics of the contact melting and the graphite-to-diamond transformation in the Co–Fe–C system, 1602

Processing
Structures with a minimum feature size of less than 100 nm in CVD-diamond for sensor applications, 511
Heat-spreading diamond films for GaN-based high-power transistor devices, 744

Properties
Thermostable resistors based on diamond-like carbon films deposited by CVD method, 1007
Properties of aluminium nitride coating obtained by vacuum arc discharge method with plasma flow separation, 1314

Properties and applications
CVD diamond: a novel high γ-coating for plasma display panels?, 809

Pulse arc ion plating
Wear-resistant multilayered diamond-like carbon coating prepared by pulse biased arc ion plating, 1850

Pulsed arc-discharge method
Amorphous carbon as a bio-mechanical coating — mechanical properties and biological applications, 153

Pulsed laser ablation
XPS studies of amorphous SiCN thin films prepared by nitrogen ion-assisted pulsed-laser deposition of SiC target, 1921

Pulsed laser deposition
Phosphorus doping and defect studies of diamond-like carbon films by pulsed laser deposition using camphoric carbon target, 984
Laser ablation of boron carbide: thin-film deposition and plume analysis, 1412
Diamond-like carbon by pulsed laser deposition from a camphoric carbon target: effect of phosphorus incorporation, 1839
Preparation of nitrogen-rich CN_x films with inductively coupled plasma CVD and pulsed laser deposition, 1901
Correlation between hydrogen content and structure of pulsed laser deposited carbon nitride films, 2107

Pulsed-laser annealing
Experimental and numerical study on pulsed-laser annealing process of diamond-like carbon thin films, 905

Pyrolysis
Electron field emission from carbon films grown from pyrolysis of kerosene, 883

Quantum mechanics
An ab initio electronic structure study of methyl adsorption and reaction on cluster models for the diamond surface, 39

Radiation damage
C^+-damaged diamond: electrical measurements after rapid thermal annealing to 500°C, 463
Ionoluminescence in CVD diamond and in cubic boron nitride, 568
CVD diamond sensors for charged particle detection, 1778

Radiation defects
Vacancy diffusion and trapping in electron-irradiated type IaA diamonds, 87
Using ion implantation to dope diamond — an update on selected issues, 1756

Radiation detectors
Influence of defect inhomogeneities in high quality natural diamond detectors, 469
CVD diamond for radiation detection devices, 631

Radiation hardness
CVD diamond for radiation detection devices, 631

Radiation induced defects
Interstitial aggregates in diamond, 434

Radiation induced effects
Electrical properties and defect analysis of neutron irradiated undoped CVD diamond films, 601

Radiation-induced defects
Ion-induced electron emission from Boron-doped diamond: effect of surface hydrogenation and sample temperature, 824
EPR and optical imaging of the growth-sector dependence of radiation-damage defect production in synthetic diamond, 1681

Radical
Detection of C_2 radicals in low-pressure inductively coupled plasma source for diamond chemical vapor deposition, 388
Diamond synthesis by electrolysis of acetates, 942

Radical species
Modeling the effect of oxygen on vapor phase diamond deposition inside micro-trenches, 2212

Radio-frequency plasma
Comparison of diamond-like carbon films synthesized by 2.45 GHz microwave and 13.56 MHz multi-jet radiofrequency plasma sources, 920

Raman
Recovery of diamond after irradiation at high energy and annealing, 82
Analysis of the Fano in diamond, 531
Microstructure and adhesion characteristics of diamond-like carbon films deposited on steel substrates, 1528

Raman scattering

Consequences of size-effect and spectral inhomogenity on Raman and photoluminescence spectra of a-C:H, 161

Raman spectra
The introducing of fluorine into the deposition of BN: a successful method to obtain high-quality, thick cBN films with low residual stress, 1868

Raman spectroscopy
Resonant Raman studies of tetrahedral amorphous carbon films, 76
Process optimization in the low-pressure flat flame growth of diamond, 289
High compressive stress in nanocrystalline diamond films grown by microwave plasma chemical vapor deposition, 352
Formation of a conducting layer by high energy metal ion implantation into diamond, 606
Fluorine incorporation into amorphous hydrogenated carbon films deposited by plasma-enhanced chemical vapor deposition: structural modifications investigated by X-ray photoelectron spectrometry and Raman spectroscopy, 910
Hydrogen effects on the post-production modification of diamond-like carbon produced by pulsed laser deposition, 970
Mechanical properties of d.c. magnetron-sputtered and pulsed vacuum arc deposited ultra-thin nitrogenated carbon coatings, 1024
Ar-dilution effects on the elastic and structural properties of hydrogenated hard carbon films deposited by plasma-enhanced chemical vapor deposition, 1088
Chemical bonding and nanomechanical studies of carbon nitride films synthesised by reactive pulsed laser deposition, 1109
Arc plasma jet method producing single-wall carbon nanotubes, 1185
Growth of carbon nanostructure materials using laser vaporization, 1190
Nature of confinement of phonons in nanocrystalline CVD diamond, 1477
A joint macro-/micro- Raman investigation of the diamond lineshape in CVD films: the influence of texturing and stress, 1535
Synthesis of nanocrystalline diamond films using microwave plasma CVD, 1588
High quality CVD diamond for detection applications: structural characterization, 1788
Deposition of iron containing amorphous carbon films by filtered cathodic vacuum arc technique, 2018
Influence of nitrogen ion energy on the Raman spectroscopy of carbon nitride films, 2137

Rapid thermal annealing
Post-growth rapid thermal annealing effect on hydrogenated amorphous silicon carbide thin film, 1268

Rapid thermal processing
Carbon nanotube growth by rapid thermal processing, 1810

RBS
Ion channeling studies of hydrogen in homoepitaxially grown CVD diamond, 411

Reactive ion etching
Structures with a minimum feature size of less than 100 nm in CVD-diamond for sensor applications, 511

Reactive sputtering
Laser annealing of low temperature grown gallium nitride, 1311

Real time characterization
Multichannel ellipsometry from 1.5 to 6.5 eV for real time characterization of wide band gap materials: phase identification in boron nitride thin films, 1304

Reconstructions
Atomic hydrogen beam etching of carbon superstructures on 6H-SiC (0001) studied by reflection high-energy electron diffraction, 1218

Recording heads
Diamond-like carbon applications in high density hard disc recording heads, 271

Recovery of diamond
Recovery of diamond after irradiation at high energy and annealing, 82

Reduced C–O–H fluid
Reactions between carbon and a reduced C–O–H fluid under diamond-stable HP–HT condition, 2125

Reflection
Atomic hydrogen beam etching of carbon superstructures on 6H-SiC (0001) studied by reflection high-energy electron diffraction, 1218

Reflection high-energy electron diffraction
Unusual RHEED patterns of a homoepitaxial diamond (001) surface explained by surface tilt, 1655

Refractory particles
The influence of boron compounds' particles (TiB_2, BN^{cub}) on the thermal stability and the mechanical strength of synthesized carbonado after heating, 2024

Remote process
Comparison of diamond-like carbon films synthesized by 2.45 GHz microwave and 13.56 MHz multi-jet radiofrequency plasma sources, 920

REMPI measurements
Experimental data vs. 3-D model calculations of HFCVD processes: correlations and discrepancies, 364

Resistor
Thermostable resistors based on diamond-like carbon films deposited by CVD method, 1007

Resonance frequency
Characterization of AFM cantilevers coated with diamond-like carbon, 2190

Response time
Pulsed sub-band-gap photoexcitation of AlN, 1326

RF
Cubic boron nitride film synthesis by reactive sputtering with pulsed RF substrate bias, 1380

RF plasma
Atomic hydrogen beam etching of carbon superstructures on 6H-SiC (0001) studied by reflection high-energy electron diffraction, 1218

RF Plasma-CVD
Formation of silicon carbide and silicon carbonitride by RF-plasma CVD, 1160

RHEED
Formation of a conducting layer by high energy metal ion implantation into diamond, 606

Sapphire
Growth of {111}-oriented diamond on Pt/Ir/Pt substrate deposited on sapphire, 1633

Scanning electron microscopy
UHV μ-electron beam evaluation of the CVD diamond particles grown on Si(001), 48
Diamond/sp^2-bonded carbon structures: quantum well field electron emission?, 840
Arc plasma jet method producing single-wall carbon nanotubes, 1185
Near-field cathodoluminescence of nanoscopic diamond properties, 1647

Scanning probe measurement
Spatial variation of field emission current on nitrogen-doped diamond-like carbon surfaces by scanning probe method, 863

Scanning tunneling microscopy
Microscopic study of field emission from diamond particles, 818
Defects at the carbon terminated SiC(001) surface, 1259

Schottky barrier
The interfacial properties of erbium films on the two polar faces of 6H-SiC(0001), 13

Schottky barrier height
Study on electrical characteristics of metal/boron nitride/metal and boron nitride/silicon structures, 1404

Schottky diode
Characterisation of silicon carbide detectors response to electron and photon irradiation, 657

Schottky diodes
Electrical AC behaviour of MPCVD diamond Schottky diodes, 615

Schottky/ohmic contacts
Spectroscopic investigations of diamond/hydrogen/metal and diamond/metal interfaces, 506

Secondary electrons
Ion-induced electron emission from Boron-doped diamond: effect of surface hydrogenation and sample temperature, 824

Segmented structure
Preparation, morphology and microstructure of segmented graphite nanofibers, 2057

Selective deposition
Selective deposition of diamond films on insulators by selective seeding with a double-layer mask, 1573

Selective seeding
Selective deposition of diamond films on insulators by selective seeding with a double-layer mask, 1573

Semi-insulating SiC
Characterisation of silicon carbide detectors response to electron and photon irradiation, 657
Photoconductivity of semi-insulating SiC:⟨V,Al⟩, 2035

Semiconducting diamond
Relationships between surface character and electrochemical processes on diamond electrodes: dual roles of surface termination and near-surface hydrogen, 1804

Sensors
pH sensing by surface-doped diamond and effect of the diamond surface termination, 667
Analysis of piezoresistive properties of CVD-diamond films on silicon, 1670

Sharp tip
Anisotropic etching of a fine column on a single crystal diamond, 1732

SiC
Formation of Si clusters in electron-irradiated SiC studied by electron energy-loss spectroscopy, 1251
Thermal oxidation of polymer-like amorphous $Si_xC_yH_wO_z$ nanoparticles, 1295

SiC layer
Low temperature synthesis of P-SiC by a metal vapor vacuum arc ion source, 2195

SiCN
XPS studies of amorphous SiCN thin films prepared by nitrogen ion-assisted pulsed-laser deposition of SiC target, 1921

Silicon
Silicon substrate preparation for epitaxial diamond crystals, 300
High pressure synthesis of cubic boron nitride from Si-hBN system, 1465

Silicon carbide
Characterisation of silicon carbide detectors response to electron and photon irradiation, 657
Group III–V impurities in β-SiC: lattice distortions and solubility, 1278
Paramagnetic defects in silicon carbide grains embedded in SiO_2 matrix, 1287
A comparative study of Ar and H_2 as carrier gases for the growth of SiC films on Si(100) by electron cyclotron resonance chemical vapor deposition at low temperature, 2075

Silicon carbon nitride
Characteristics of Si—C—N films deposited by microwave plasma CVD on Si wafers with various buffer layer materials, 1910
Bonding characterization and nano-indentation study of the amorphous SiC_xN_y films with and without hydrogen incorporation, 1916

Silicon carbonitride
Formation of silicon carbide and silicon carbonitride by RF-plasma CVD, 1160

Silicon incorporation
A study of microstructure and nanomechanical properties of silicon incorporated DLC films deposited on silicon substrates, 1070

Silicon nitride
Influence of CF_4 addition for HFCVD diamond growth on silicon nitride substrates, 2002

Silicon step
Early stages of the HFCVD process on multi-vicinal silicon surfaces studied by electron microscopy probes (SEM, TEM), 1612

Single crystal
Comparison of the creep properties of single crystal and polycrystalline diamond cutting tool materials, 755
Point defects in cubic boron nitride crystals, 1408
Anisotropic etching of a fine column on a single crystal diamond, 1732

Single-particle processing
Broadband electronics for CVD-diamond detectors, 1765
The use of CVD-diamond for heavy-ion detection, 1770

Single-wall carbon nanotubes
Arc plasma jet method producing single-wall carbon nanotubes, 1185

Sintering
Influence of CF_4 addition for HFCVD diamond growth on silicon nitride substrates, 2002

Size effect
Consequences of size-effect and spectral inhomogenity on Raman and photoluminescence spectra of a-C:H, 161

Small spot XPS
A study on the bonding structure and mechanical properties of magnetron sputtered CN_x thin films, 1179

Smooth fine-grained diamond
Smooth fine-grained diamond coatings on titanium alloy for mechanical applications, 337

Solution growth
Diamond synthesis by electrolysis of acetates, 942

sp^2
The influence of the h-BN morphology and structure on the c-BN growth, 1352

sp^2 bonding
Diamond/sp^2-bonded carbon structures: quantum well field electron emission?, 840
Chemical bonding and nanomechanical studies of carbon nitride films synthesised by reactive pulsed laser deposition, 1109

sp^3 bonding
The sp^3 bond fraction in carbon films prepared by mass-separated ion beam deposition, 895
Dual ion plasma-beam sources used to maximise sp^3 C–C bonds in carbon nitride, 1125
X-Ray absorption studies of cubic boron–carbon–nitrogen films grown by ion beam assisted evaporation, 1165
The influence of the h-BN morphology and structure on the c-BN growth, 1352

Space group symmetry
Is there theoretical evidence for a metallic carbon polymorph with space group symmetry $Fm\bar{3}m$ at ambient conditions?, 2225

Spectral inhomogenity
Consequences of size-effect and spectral inhomogenity on Raman and photoluminescence spectra of a-C:H, 161

Spectroscopic ellipsometry
Spectroscopic ellipsometric study of tetrahedral amorphous carbon films: optical properties and modelling, 1132

Spectroscopy
Detection of C_2 radicals in low-pressure inductively coupled plasma source for diamond chemical vapor deposition, 388
Phonon-assisted electronic transitions in phosphorus-doped n-type chemical vapor deposition diamond films, 439
Optical and structural properties of nitrogen doped amorphous carbon films grown by rf plasma-enhanced CVD, 1002
Point defects in cubic boron nitride crystals, 1408
Vibrational sum-frequency observation of synthetic diamonds, 1643
Near-field cathodoluminescence of nanoscopic diamond properties, 1647

Sputtering
Real-time monitoring, growth kinetics and properties of carbon based materials deposited by sputtering, 117
Microstructural and mechanical properties of nanometric-multilayered a-CN/a-C/.../a-CN coatings deposited by rf-magnetron sputtering and nitrogen ion-beam bombardment, 952
A complementary study of bonding and electronic structure of amorphous carbon films by electron spectroscopy and optical techniques, 960
Wet etching of hydrogenated amorphous carbon films, 976
Bonding structure of carbon nitride films deposited by reactive plasma beam sputtering, 1142
Comparative study of microstructure in a-C_xN_{1-x} films deposited by radiofrequency magnetron sputtering, 1156
Carbon nitride thin-films deposited from coupled r.f.-magnetron sputtering and ion beam-assisted processes, 1175
Paramagnetic defects in silicon carbide grains embedded in SiO_2 matrix, 1287

Stainless steel
Influence of nitrided and carbonitrided interlayers on enhanced nucleation of diamond on stainless steel 304, 1983

Statistically oriented
Post-growth rapid thermal annealing effect on hydrogenated amorphous silicon carbide thin film, 1268

Steel
Effect of ion beam nitriding on diamond nucleation and growth onto steel substrates, 1506
Mechanical and tribological properties of diamond-like carbon films prepared on steel by ECR-CVD process, 1855

Stress
High compressive stress in nanocrystalline diamond films grown by microwave plasma chemical vapor deposition, 352
Stress study of HFCVD boron-doped diamond films by X-ray diffraction measurements, 750
Hardness, intrinsic stress, and structure of the a-C and a-C:H films prepared by magnetron sputtering, 1076
Internal stresses in ta-C films deposited by pulse arc discharge method, 1103
Stress related morphological defects in SiC epitaxial layers, 1246
Cubic boron nitride film synthesis by reactive sputtering with pulsed RF substrate bias, 1380
A joint macro-/micro- Raman investigation of the diamond lineshape in CVD films: the influence of texturing and stress, 1535
The introducing of fluorine into the deposition of BN: a successful method to obtain high-quality, thick cBN films with low residual stress, 1868
Depth resolved stress investigations of c-BN thin films, 1875
Deposition of iron containing amorphous carbon films by filtered cathodic vacuum arc technique, 2018

Structure
Synthesis, HRTEM and electron diffraction studies of B/N-doped C and BN nanotubes, 63
Hardness, intrinsic stress, and structure of the a-C and a-C:H films prepared by magnetron sputtering, 1076
Growth of carbon nanostructure materials using laser vaporization, 1190
High-resolution electron microscopy and structural optimization of C_{36}, $B_{36}N_{36}$ and $Fe_{36}N_{36}$ clusters, 1205
A classical molecular dynamics simulation of the carbon cluster formation process on a parallel computer, 1224

Substrate bending
High compressive stress in nanocrystalline diamond films grown by microwave plasma chemical vapor deposition, 352

Sulfur solvent
High-pressure synthesis and characterization of diamond from a sulfur–carbon system, 2145

Superhard and superelastic material
Superhard and superelastic films of polymeric C_{60}, 2044

Supersonic beam
Electrical conduction in nanostructured carbon films produced by

supersonic cluster beam deposition, 989

Surface
Diamond surface conductivity experiments and photoelectron spectroscopy, 416
Structures with a minimum feature size of less than 100 nm in CVD-diamond for sensor applications, 511
Potassium adsorption on hydrogen- and oxygen-terminated diamond(100) surfaces, 519
Mechanistic aspects of the sonoelectrochemical degradation of the reactive dye Procion Blue at boron-doped diamond electrodes, 662
An investigation of the surface reactivity of diamond photocathodes with molecular and atomic oxygen species, 710
Vibrational sum-frequency observation of synthetic diamonds, 1643

Surface acoustic wave
Properties of diamond-like carbon films on crystalline quartz and lithium niobate, 1843

Surface acoustic waves
Dispersion of surface acoustic waves in polycrystalline diamond plates, 686

Surface characterisations
MPACVD diamond films for surface acoustic wave filters, 681

Surface conductivity
Diamond surface conductivity experiments and photoelectron spectroscopy, 416
The correlation between surface conductivity and adsorbate coverage on diamond as studied by infrared spectroscopy, 429

Surface profile
Lapping performance guide of poly-crystal diamond particles through morphological analysis, 376

Surface region
Carrier generation within the surface region of hydrogenated thin film polycrystalline diamond, 423

Surface tension
Wettability of HF-CVD diamond films, 781

Surface termination
pH sensing by surface-doped diamond and effect of the diamond surface termination, 667
Relationships between surface character and electrochemical processes on diamond electrodes: dual roles of surface termination
and near-surface hydrogen, 1804

Surface treatments
Diamond deposition on hardmetal substrates after pre-treatment with aluminium or aluminium compounds, 790

Switching
Switching phenomena in boron-implanted amorphous carbon films, 1036

Synthetic diamond
Photoluminescence excitation study of cobalt-related optical centers in high-pressure high-temperature diamond, 59
Use of high-sensitivity diamond detectors in DC mode for detailed beam-profile measurements in particle accelerators, 706
Diamond synthesis by electrolysis of acetates, 942
Vibrational sum-frequency observation of synthetic diamonds, 1643
EPR and optical imaging of the growth-sector dependence of radiation-damage defect production in synthetic diamond, 1681

ta-C
CVD diamond: a novel high γ-coating for plasma display panels?, 809
Low friction ta-C films with hydrogen reservoirs, 1030

ta-C films
Hard carbon nanocomposite films with low stress, 1082

ta-C:Al films
Hard carbon nanocomposite films with low stress, 1082

ta-C:Ti films
Hard carbon nanocomposite films with low stress, 1082

TEM
Laser annealing of low temperature grown gallium nitride, 1311
Structure analysis of cBN films prepared by DC jet plasma CVD from an $Ar-N_2-BF_3-H_2$ gas system, 1881

Temperature
Effect of chromium on the kinetics of the contact melting and the graphite-to-diamond transformation in the Co–Fe–C system, 1602

Temperature dependence
Subbandgap absorption from photocurrent spectra in $Al_{0.18}GaN/GaN$ heterostructures, 1331

Temperatures
MPCVD diamond tool cutting-edge coverage: dependence on the side wedge angle, 803

Tetrahedral
Applications of tetrahedral amorphous carbon in limited volatility memory and in field programmable gate arrays, 230

Tetrahedral amorphous carbon
Resonant Raman studies of tetrahedral amorphous carbon films, 76
Intrinsic stress and stiffness variations in amorphous carbon, 139
Study of the mechanical properties of tetrahedral amorphous carbon films by nanoindentation and nanowear measurements, 145
Amorphous carbon as a bio-mechanical coating — mechanical properties and biological applications, 153
Comparison of deposition methods for ultra thin DLC overcoat film for MR head, 1017
Spectroscopic ellipsometric study of tetrahedral amorphous carbon films: optical properties and modelling, 1132

Tetrahedral amorphous carbon (TAC)
A review of the effects of carbon self-implantation into amorphous carbon, 224

Tetrahedral amorphous carbon film
Field emission from tetrahedral amorphous carbon films with various surface morphologies, 1515

Tetrahedral amorphous carbon films
Properties of diamond-like carbon films on crystalline quartz and lithium niobate, 1843

Texture
Growth of diamond films by a 5-kW microwave plasma CVD reactor, 312
A joint macro-/micro- Raman investigation of the diamond lineshape in CVD films: the influence of texturing and stress, 1535

Theory
An ab initio electronic structure study of methyl adsorption and reaction on cluster models for the diamond surface, 39

Thermal annealing
Field emission studies of low-temperature thermal annealing of

nitrogen-doped hydrogenated amorphous carbon (a-C:H:N) films, 889
Hydrogen effects on the post-production modification of diamond-like carbon produced by pulsed laser deposition, 970

Thermal chemical vapor deposition
Oriented carbon microfibers grown by catalytic decomposition of acetylene and their field emission properties, 878

Thermal conductivity
Properties of diamond films deposited by multi-cathode direct current plasma assisted CVD method, 552
Thermal conductivity measurements on CVD diamond, 731

Thermal emission
Energy distribution of thermally emitted negative particles from type Ia diamond (100), 496

Thermal stability
Hydrogen diffusion and stability in polycrystalline CVD undoped diamond, 405
Development of single- and multi-layered metallic films on diamond by ion beam-assisted deposition, 1578
Mechanosynthesis of carbon nitride compounds, 1995
The influence of boron compounds' particles (TiB_2, BN^{cub}) on the thermal stability and the mechanical strength of synthesized carbonado after heating, 2024

Thermal-dynamics
NEXAFS characterization of nanostructured carbon thin-films exposed to hydrogen, 1195

Thermoluminescence
Thermoluminescence properties of nitrogen containing chemical vapour deposited diamond films, 2084

Thick layers
Stress related morphological defects in SiC epitaxial layers, 1246

Thick-film diamond filters
New hybrid with Q-factor-pass-band microwave filter constructed with di-electric resonators and coupled with a thick-film microstrip line made in diamond substrates, 1511

Thickness dependence
Biaxial elastic modulus of very thin diamond-like carbon (DLC) films, 2069

Thin CN_x film
Mechanical properties and characterisation of very thin CN_x films synthesised by IBAD, 2199

Thin film
Laser ablation of boron carbide: thin-film deposition and plume analysis, 1412

Thin film polycrystalline diamond
Carrier generation within the surface region of hydrogenated thin film polycrystalline diamond, 423

Thin films
Current-induced conditioning of hydrogenated amorphous carbon thin films for field emission, 873
Micromechanical and microtribological properties of BCN thin films near the B_4C composition deposited by r.f. magnetron sputtering, 1892

Three-point bending
Accurate measurement of strength and fracture toughness for miniature-size thick diamond-film samples by three-point bending at constant loading rate, 770

Tight binding method
Electronic properties of carbon nanotubes with pentagon–heptagon pair defects, 1818

Time-resolved emission spectroscopy
Laser ablation of boron carbide: thin-film deposition and plume analysis, 1412

Tools
Multi-layer structure for chemical vapor deposition diamond on electroplated diamond tools, 332

Topographic fluorescence
Defects in coloured natural diamonds, 474

Topological defect
Electronic properties of carbon nanotubes with pentagon–heptagon pair defects, 1818

Toughness of interface
Fracture toughness of the interface between CVD diamond film and silicon substrate in the relation with methane concentration in the source gas mixture, 760

Transfer moulding
Microstructured diamond dies for transfer moulding, 7

Transient photocurrent
Temporal response of UV sensors made of highly oriented diamond films by 193 and 313 nm laser pulses, 1794

Transient response
High-speed diamond photoconductors: a solution for high rep-rate deep-UV laser applications, 650

Transmission electron microscopy
Synthesis, HRTEM and electron diffraction studies of B/N-doped C and BN nanotubes, 63
Deposition of alumina coatings on monocrystalline diamonds by sol–gel techniques, 515
Arc plasma jet method producing single-wall carbon nanotubes, 1185
High-resolution electron microscopy and structural optimization of C_{36}, $B_{36}N_{36}$ and $Fe_{36}N_{36}$ clusters, 1205
Synthesis of boron nitride nanotubes and nanocapsules with LaB_6, 1231
Atomic structures and stability of hexagonal BN, diamond and Au multiply-twinned nanoparticles with five-fold symmetry, 1398
Early stages of the HFCVD process on multi-vicinal silicon surfaces studied by electron microscopy probes (SEM, TEM), 1612
Cross-sectional TEM study of unepitaxial crystallites in a homoepitaxial diamond film, 2030
A comparative study of Ar and H_2 as carrier gases for the growth of SiC films on Si(100) by electron cyclotron resonance chemical vapor deposition at low temperature, 2075
Structure of unepitaxial crystallites in a homoepitaxial diamond film, 2096

Traps and defects
Influence of defect inhomogeneities in high quality natural diamond detectors, 469

Trench
Modeling the effect of oxygen on vapor phase diamond deposition inside micro-trenches, 2212

Tribology
High velocity sand impact damage on CVD diamond, 459
Low friction ta-C films with hydrogen reservoirs, 1030
Mechanical and tribological characterization of diamond-like carbon coatings on orthopedic materials, 1043
Tribological and mechanical properties of diamond-like carbon

prepared by high-density plasma, 1063
The structure and tribological property of amorphous carbon and carbon nitride films prepared by ECR plasma sputtering method, 1093

Triode structure
Application of carbon nanotubes to field emission displays, 265
An under-gate triode structure field emission display with carbon nanotube emitters, 1705

Triple junction
Effect of non-diamond carbon etching on the field emission property of highly sp^2 bonded nanocrystalline diamond films, 847

Tungsten carbide
Effect of WC-Co substrates pre-treatment and microstructure on the adhesive toughness of CVD diamond, 786
Adherent diamond coatings on cemented carbide substrates with different cobalt contents, 1700

Tungsten carbide (WC)
Wettability studies of reactive brazing alloys on CVD diamond plates, 775

Tunneling
Numerical simulation of I–V characteristics of carbon nanotube based tunneling systems, 1814

Turn-on field
Novel plasma chemical vapor deposition method of carbon nanotubes at low temperature for field emission display application, 248

Twinning
The role of methyl radicals and acetylene in [100] vs. [111] diamond growth, 1627

ULSI chips
Amorphous carbon based materials as the interconnect dielectric in ULSI chips, 234

Ultra-thin films
Intrinsic stress measured on ultra-thin amorphous carbon films deposited on AFM cantilevers, 94

Ultrananocrystalline
Ultrananocrystalline diamond thin films for MEMS and moving mechanical assembly devices, 1952

Ultrasonic measurements
Mechanical properties of d.c. magnetron-sputtered and pulsed vacuum arc deposited ultra-thin nitrogenated carbon coatings, 1024

Ultrasonics
Dispersion of surface acoustic waves in polycrystalline diamond plates, 686

Ultraviolet sensor
Temporal response of UV sensors made of highly oriented diamond films by 193 and 313 nm laser pulses, 1794

Under-gate structure
An under-gate triode structure field emission display with carbon nanotube emitters, 1705

Undoped polycrystalline diamond films
A study on the conduction path in undoped polycrystalline diamond films, 2174

Urbach tails
Subbandgap absorption from photocurrent spectra in $Al_{0.18}GaN/GaN$ heterostructures, 1331

UV photocurrent spectroscopy
Subbandgap absorption from photocurrent spectra in $Al_{0.18}GaN/GaN$ heterostructures, 1331

UV range
Diamond UV detectors for future solar physics missions, 673
Influence of metal–diamond interfaces on the response of UV photoconductors, 698
CVD diamond optics for ultraviolet, 736

UV sensors
Diamond photoconductors: operational lifetime and radiation hardness under deep-UV excimer laser irradiation, 715

UV-VIS-NIR
Defects in coloured natural diamonds, 474

Vacancies
Vacancy diffusion and trapping in electron-irradiated type IaA diamonds, 87

Vacancy complex
Space charge spectroscopy of diamond, 639

Vacancy complexes
Negative charging of mono-and divacancies in IIa diamonds by monochromatic illumination, 585

Vapour growth
A classical molecular dynamics simulation of the carbon cluster formation process on a parallel computer, 1224

Variation of stiffness
Intrinsic stress and stiffness variations in amorphous carbon, 139

Visible and UV Raman spectroscopy
Smooth fine-grained diamond coatings on titanium alloy for mechanical applications, 337

VUV laser
High-speed diamond photoconductors: a solution for high rep-rate deep-UV laser applications, 650

Wafer
Diamond films grown by a 60-kW microwave plasma chemical vapor deposition system, 1569

Water wettability
Wettability of HF-CVD diamond films, 781

Wear
Microstructured diamond dies for transfer moulding, 7
Study of the mechanical properties of tetrahedral amorphous carbon films by nanoindentation and nanowear measurements, 145
Adhesion properties of diamond-like coated orthopaedic biomaterials, 1098
Microstructure and adhesion characteristics of diamond-like carbon films deposited on steel substrates, 1528
The high temperature–high pressure sintering of diamond–Cu–Si–B composite, 1607
Diamond-like carbon films in multilayered interference coatings for IR optical elements, 1846
Mechanical and tribological properties of diamond-like carbon films prepared on steel by ECR-CVD process, 1855
Micromechanical and microtribological properties of BCN thin films near the B_4C composition deposited by r.f. magnetron sputtering, 1892
Influence of substrate treatment on the tribological properties of DLC coatings, 2232

Wear resistance
Amorphous Si_xC_{1-x} films: an example of materials presenting low indentation hardness and high wear resistance, 1053

Well-aligned carbon nanofiber
Field emission and structure of aligned carbon nanofibers deposited by ECR-CVD plasma method, 254

Wide bandgap materials
Multichannel ellipsometry from 1.5 to 6.5 eV for real time characterization of wide band gap materials: phase identification in boron nitride thin films, 1304

Wood
Tribological properties of NCD coated cemented carbides in contact with wood, 1

X-Ray diffraction
Stress study of HFCVD boron-doped diamond films by X-ray diffraction measurements, 750
Growth of carbon nanostructure materials using laser vaporization, 1190

X-Ray diffraction (XRD)
Optical and structural properties of SiC layers grown by an electron cyclotron resonance CVD technique, 1264

X-Ray photoelectron spectroscopy
Synthesis of boron nitride film with low dielectric constant for its application to silicon ultralarge scale integrated semiconductors, 1375
XPS studies of amorphous SiCN thin films prepared by nitrogen ion-assisted pulsed-laser deposition of SiC target, 1921

X-Ray photoelectron spectroscopy (XPS)
AFM and XPS studies of a homoepitaxial diamond (001) surface nitrided using 500-eV N_2^+ ion beam, 1676

X-Ray reflectometry
X-Ray reflectometry study of diamond-like carbon films obtained by plasma-assisted chemical vapor deposition, 1491

X-Ray spectroscopies
Chemical bonding in carbon nitride films studied by X-ray spectroscopies, 1897

XANES
X-Ray absorption studies of cubic boron–carbon–nitrogen films grown by ion beam assisted evaporation, 1165
X-Ray absorption studies of bonding environments in graphitic carbon nitride, 1170

XPS
Field emission and structure of aligned carbon nanofibers deposited by ECR-CVD plasma method, 254
Characterization of diamond fluorinated by glow discharge plasma treatment, 490
Transition metal oxide anti-reflection coatings for airborne diamond optics, 536
A study of microstructure and nanomechanical properties of silicon incorporated DLC films deposited on silicon substrates, 1070

XRD
AFM investigation of growth process of C_{60} thin films on a KBr(001) surface, 980

YIG
New hybrid with Q-factor-pass-band microwave filter constructed with di-electric resonators and coupled with a thick-film microstrip line made in diamond substrates, 1511

Young's modulus
Smooth fine-grained diamond coatings on titanium alloy for mechanical applications, 337
Mechanical properties of a-C:H multilayer films, 1833
Mechanical properties of cubic BC_2N, a new superhard phase, 2228
